

Viber for Windows 8.1 updates support adding Video calls

After the release of yesterday's Viber upgrade for Windows Phone users, the app continues to be updated on Windows 8.1 with support for adding Video call features.

After the release of yesterday's Viber upgrade for Windows Phone users, the app continues to be updated on Windows 8.1 with support for adding Video call features.

Download Viber for Windows Phone

Download Viber for Windows

Download Viber for Android

Download Viber for iOS

Details change in version 4.0:

1. Make Video calls (*support on PC*)
2. Viber Out
3. Easily view all photos in conversation with swiping
4. New emoticons

5. Support for additional languages

If you want to use Viber on Windows 8.1, you first need to install and use on Windows Phone or other mobile platforms.
