

# Viber for Windows Phone 8 updates the new interface

Viber has updated its Windows Phone 8 application to version 3.1. The most obvious improvement is that the interface of the application has been refreshed in a way that is easier to read, larger text and more suitable color combinations than before.

**Viber has updated its Windows Phone 8 application to version 3.1. The most obvious improvement is that the interface of the application has been refreshed in a way that is easier to read, larger text and more suitable color combinations than before.**

**Viber 3.1** supports changing the wallpaper for the application and we can select images from the "*Background Gallery*" library. Users can also pin a conversation to the Start screen as Live Tile and see real-time updates.

Improved ability to synchronize, transfer calls between Viber on Windows Phone 8 and **Viber on PC or Mac** , push notification mode is also updated to *"ensure that you do not miss any messages or calls "*

Viber revealed that in the near future, they will continue to add some new features to the application on Windows Phone. You can now download Viber 3.1 [here](#) .
