

Viber has a version running on Windows 8.1

According to Neowin, similar to the version running on smartphones, Viber version of Windows RT / Windows 8.1 will still be fully complemented with free calling features, group chat or create funny stickers while chatting.

Viber announced on December 19 that it has released an extra version of Viber running on Windows RT / Windows 8.1 operating system.

Interface of Viber when running on Windows 8.1

According to Neowin , similar to the version running on smartphones, Viber version of Windows RT / **Windows 8.1** will still be fully complemented with free calling features, group chat or create funny stickers while chatting.

The addition of Viber to *Windows RT / Windows 8.1* will create a fierce competition for the Skype version that is pre-installed on the Windows operating system.

Currently, *Windows RT / Windows 8.1* users can download the Viber version for free on the Windows Store app store.
