

Vietnameseization of OpenOffice software is completed

Complete Vietnameseization of 100% interface and the help of OpenOffice software version 3.0 (latest version). This information is announced on the OpenOffice office software project homepage (openoffice.org).

Complete Vietnameseization of 100% interface and the help of OpenOffice software version 3.0 (latest version).

This information is announced on the OpenOffice office software project homepage (openoffice.org). Completing the Vietnameseization of OpenOffice 3.0 has made a great contribution to the Vietnamese open source community under the coordination of an Australian overseas Vietnamese and Clytie Siddal. The interface part of OpenOffice has been Vietnameseized from previous versions. What's new in OpenOffice 3.0 is that it basically completes the Vietnamese user help section.

Mr. Quach Tuan Ngoc, Director of IT Department (Ministry of Education and Training) said this department is assessing the quality of Vietnameseization of the new OpenOffice. The Vietnamese version of OpenOffice 3.0 (and older versions of OpenOffice) can be downloaded at <http://en.openoffice.org/about-downloads.html>.
