

Viettel uses OPPO Reno to test the connection and make the first 5G call in Vietnam, the data download speed reaches 654 Mb / s

This morning, Viettel Military Telecom Corporation has used the OPPO Reno 5G smartphone, to test for the first time connecting with 5G mobile network in Vietnam.

This morning, Viettel Military Telecom Corporation has used the OPPO Reno 5G smartphone, to test for the first time connecting with 5G mobile network in Vietnam. Specifically, it has been used to make calls over 5G mobile networks, and to measure actual data download speeds.

In theory, Viettel's 5G mobile network has a terminal connection speed of 1.5 to 1.7 Gb / s, which is equivalent to the speed of commercial fiber optic cable and far beyond the physical limit speed. 4G LTE network theory.

Viettel tested for the first time with 5G mobile network in Vietnam.

Test results showed that the 5G mobile network data download speed on this OPPO Reno smartphone reached 654 Mb / s.

OPPO Reno is one of the first smartphones to support 5G mobile networks and is also the first 5G multi-frequency smartphone approved by CTC. OPPO Reno can match 5G networks of many different countries around the world.

OPPO Reno 5G.

After the US, Australia, Japan and Korea, Vietnam has become one of the earliest countries to successfully test the 5G network in the world.
