

# View chat content on Yahoo without a password

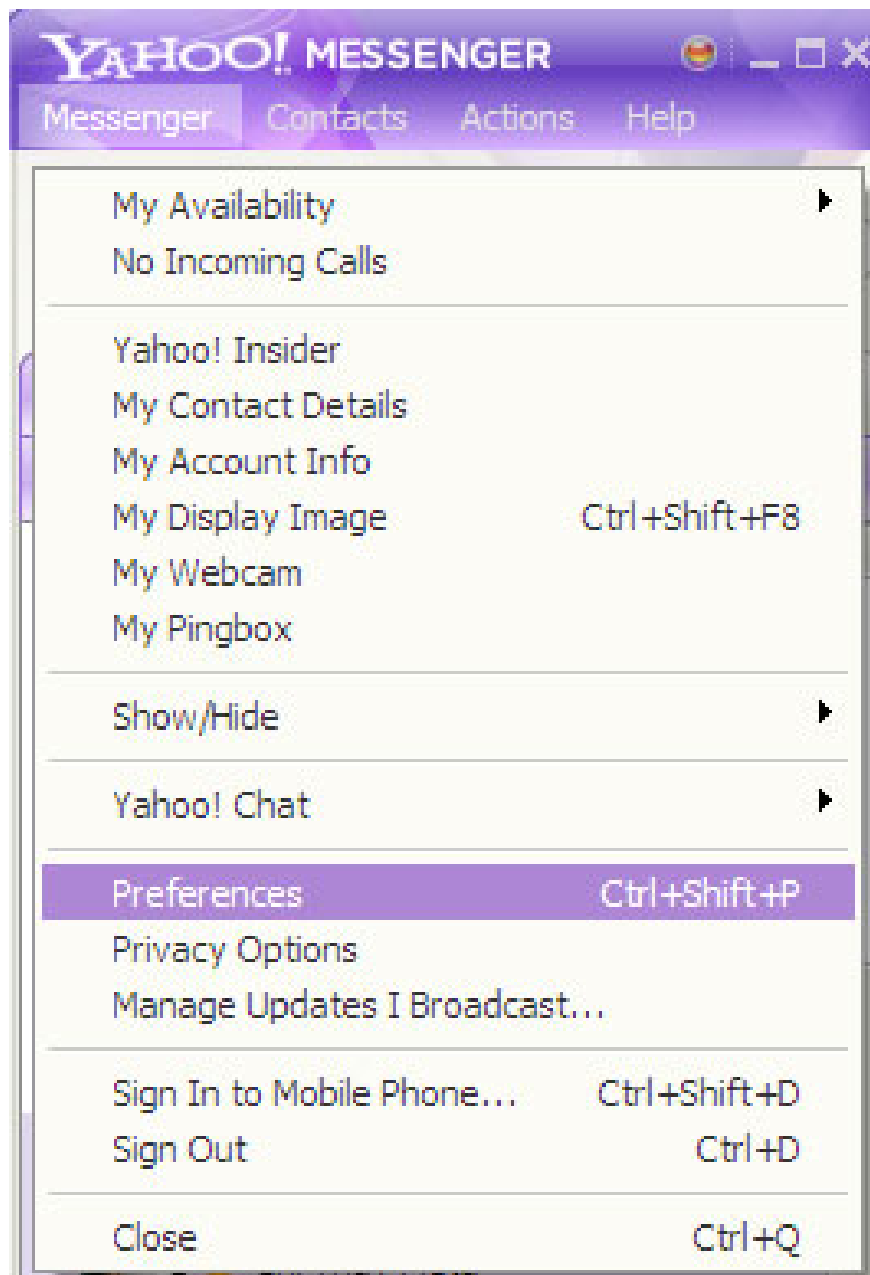

Reviewing the saved chat content on your device will be a simple task even without the network with the Yahoo Archive Decoder tool.

**Reviewing the saved chat content on your device will be a simple task even without the network with the Yahoo Archive Decoder tool.**

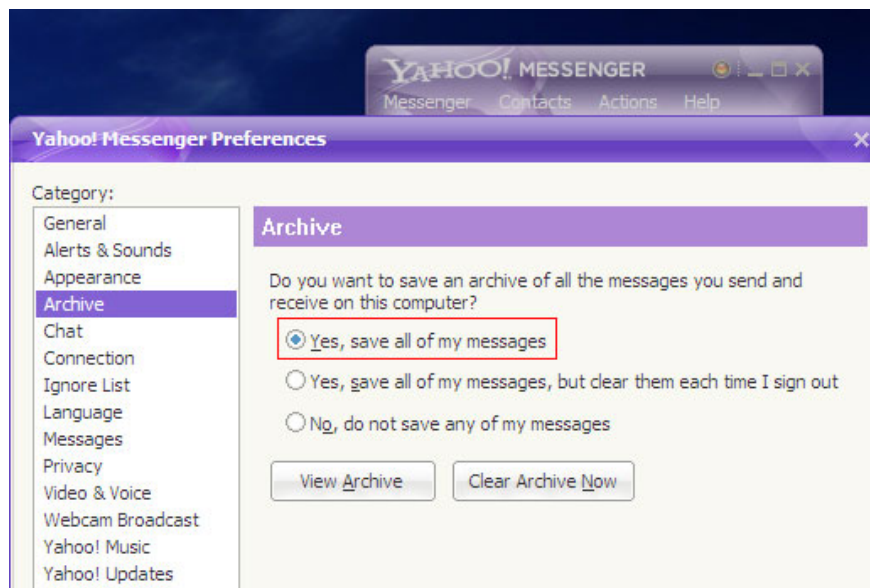

**Yahoo Archive Decoder** is a small application for reading information of Yahoo Messenger chats without having to log into Yahoo. The idea of this software developer is to help parents see and manage children's chat content better, but you can also use it to review conversations with friends. in the event of a network failure or failure to login to Yahoo. The Yahoo Archive Decoder task will be to read and decrypt encrypted chat information in DAT files located in Yahoo Messenger Profiles folder.

**Note:** In order to get DAT files to save chat information, you need to set up Yahoo Messenger to save all chat content according to the following instructions:

- First, open Yahoo's Preferences window by clicking Messenger and then choosing Preferences or using **Ctrl + Shift + P**.

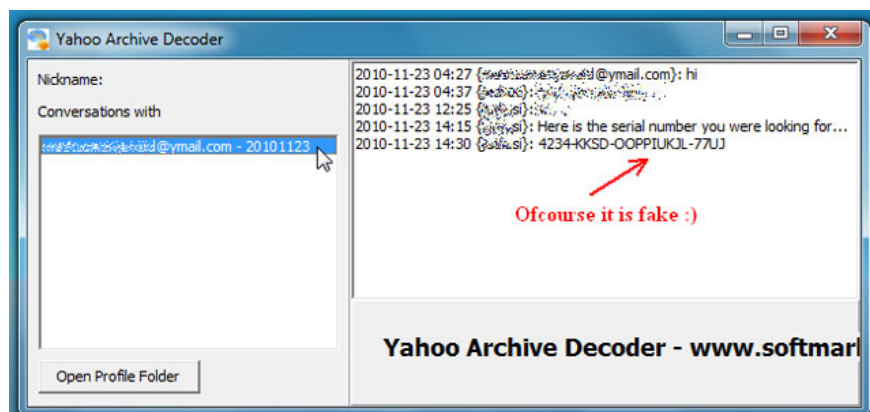

- Next, select **Archive** in Category. The right window will appear, click on the **Yes** option , **save all of my messages** and click **OK** to save the changes.

The Yahoo Archive Decoder interface is extremely simple and easy to use. What you need to do is point the path to the Profile folder of the Yahoo account you want to see through the Open Profile Folder button. If Yahoo Messenger is installed on drive C, you can go to the Profile folder of your Yahoo accounts at the following link:

C: Program FilesYahoo! MessengerProfilesArchive on your Yahoo account

Yahoo Archive Decoder is compatible with Windows XP, Win Vista and Windows 7 operating systems.
