

Virtual assistant Cortana uses age limits

Microsoft has just announced, users of the intelligent virtual assistant Cortana has been provided in Windows Phone 8.1 version must be over 13 years old.

Microsoft just announced, users of the intelligent virtual assistant Cortana has been provided in Windows Phone 8.1 version must be over 13 years old.

Notice is age-restricted when using Cortana virtual assistant

According to *Neowin* , Microsoft's move is seen as a way to prevent arbitrary child use of Cortana utility unknowingly on Windows Phone 8.1.

It is known that Microsoft is now giving the programmer the ability to download a preview of Windows Phone 8.1, before having a complete version for all users in early May.

To experience this version, programmers who can register with a developer account in the package of 19 USD / year or register to participate in *Microsoft's App Studio project* will be free of registration fee.

Windows Phone 8.1 is also the latest mobile version of Microsoft, announced at the Build 2014 event on April 24.

Windows Phone 8.1 has improved the interface of *lockscreen*, which is more fun, allowing users to customize *Live Tile* into 4 or 6 small boxes. In addition, users can create wallpapers (*can take personal photos*) inserted into the Windows Phone interface, something that Windows Phone 8 does not support.
