

Visit the world's largest model from within with Google's miniature Street View

Google has built a miniature Street View car that can move inside the Miniatur Wunderland, the world's largest railway model.

"Miniatur Wunderland" is the world's largest railway model. From the train tracks, the streets, the buildings, the trees, the surrounding landscape to the people living inside the city, the model is extremely beautiful. Currently, Miniatur Wunderland is on display in the city of Hamburg, Germany.

Google has built a miniature Street View car that can move inside the Miniatur Wunderland model to capture every corner of this model, giving us a more unique perspective from within. With Google Street View, you can walk around every street inside Miniatur Wunderland.

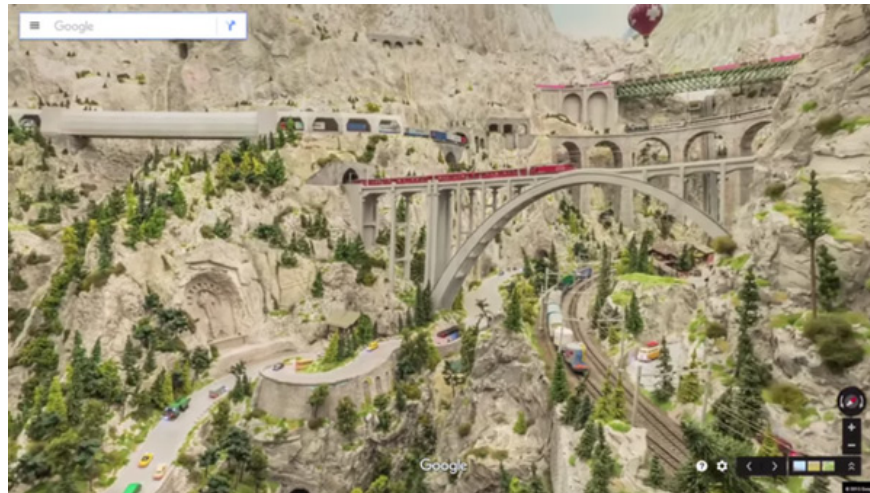

Google's miniature Street View car is capable of taking photos from the internal view of the Miniatur Wunderland model thanks to its many cameras. The one on the left is just a model and can't take pictures.

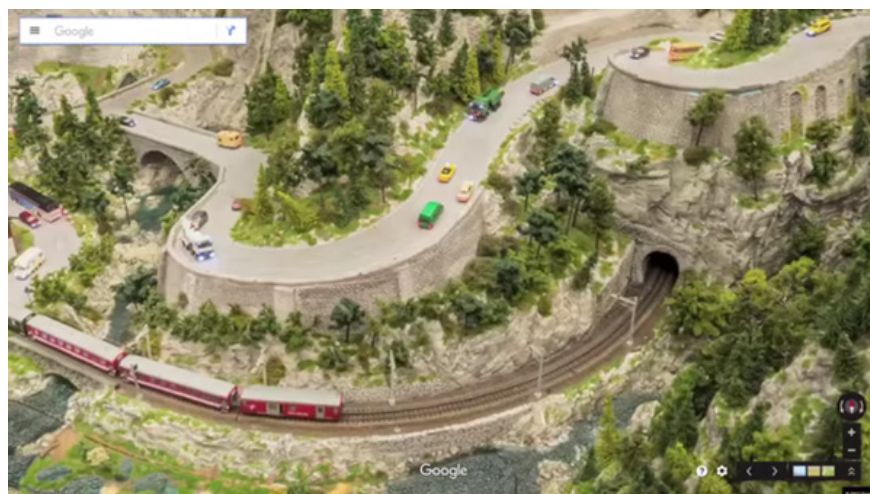

The image is part of the longest railway model in the world with a total length of 12.8 km. Another Street View car was running on it to take pictures.

In the model, railway lines connect locations that simulate famous landmarks in the world.

Model of the Street View car on the slope leads to the famous Neuschwanstein castle in Bavaria.

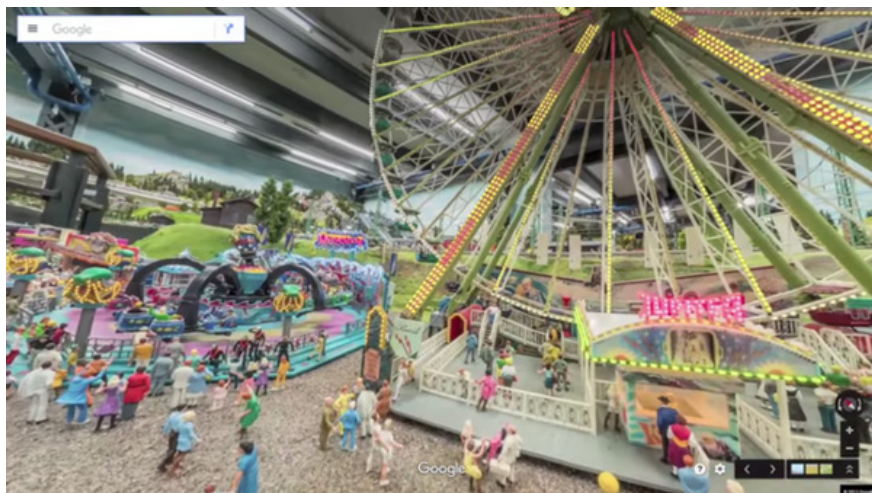

In the Wunderland model, trees, cars, roads . are all very detailed.

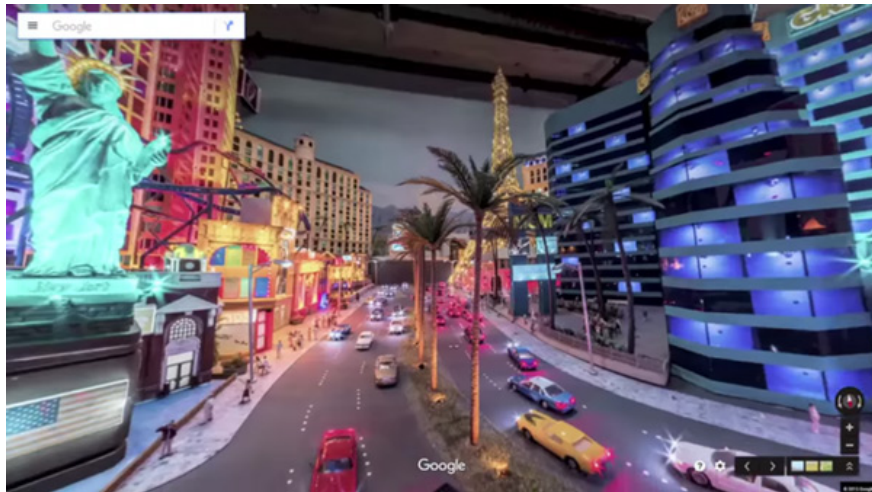

There are over 200,000 hand-painted model citizens 'live' in Miniatur Wunderland.

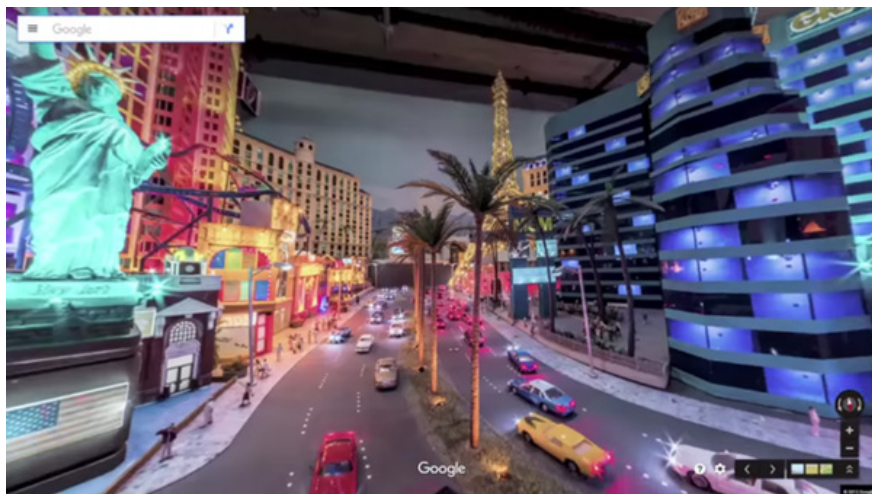

Model of a traditional fair in Germany.

If you only observe the model from the outside, the viewer will not be able to see this unique inner corner.

This is a small version of Las Vegas, the city never sleeps. Every 'living' people here have their own very authentic activities.

Everywhere in the city is brightly lit, the details are very similar to real-life Las Vegas.

After visiting Las Vegas, Google's Street View car continues its journey to Grand Canyon National Park, a famous valley.

This is a beautiful place with deep cliffs.

From the Grand Canyon, you just need to take a short train to go through Switzerland to Hamburg, Germany. This city is famous for high-rise buildings, huge train stations and a large canal for boats to pass through.

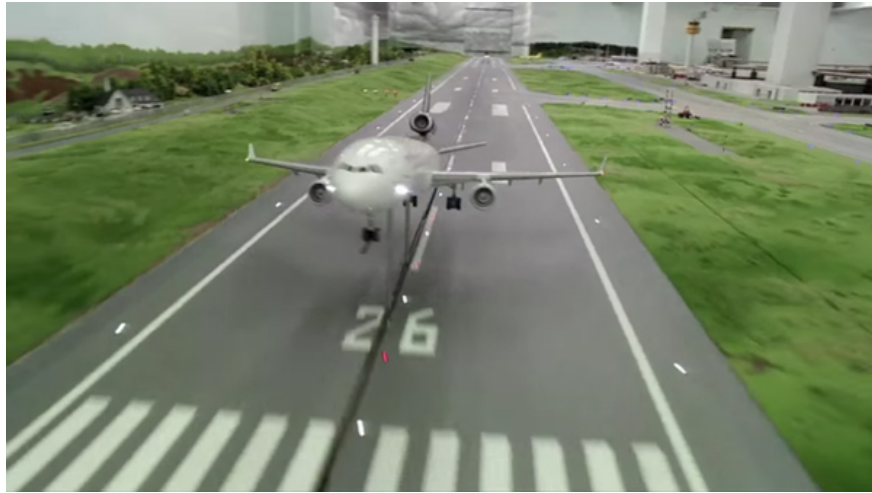

In the Miniatur Wunderland model, the city of Hamburg is the most detailed area.

Images of hundreds of people are marching on the road.

In addition, here you also visit the airport model with full details, from airplanes, special vehicles on the airport to lifters.

Even the models of these planes can take off really and disappear after a curtain.

A DJ Bobo concert with about 21,000 below audiences is dancing and enjoying music in Hamburg.

And this is the main character of the concert.

Not far from Hamburg is Austria's beautiful snow mountain with full cable car system.

The snow here is very similar, reflecting and sparkling by artists who have used glass dust to sprinkle around the model.

The last place of this model is a bogus city called Knuffingen.

Beautiful view of the city at sunset and when night falls.
