

Vivo Apex 2020: Selfie camera hidden under the screen, new gimbal stabilizer, 60W wireless fast charging

In addition to Vivo Z6 5G, Vivo continues to launch a new smartphone called Vivo Apex 2020, which is part of its conceptual product line to flaunt modern technology.

In addition to Vivo Z6 5G, Vivo continues to launch a new smartphone called Vivo Apex 2020, which is part of its conceptual product line to flaunt modern technology.

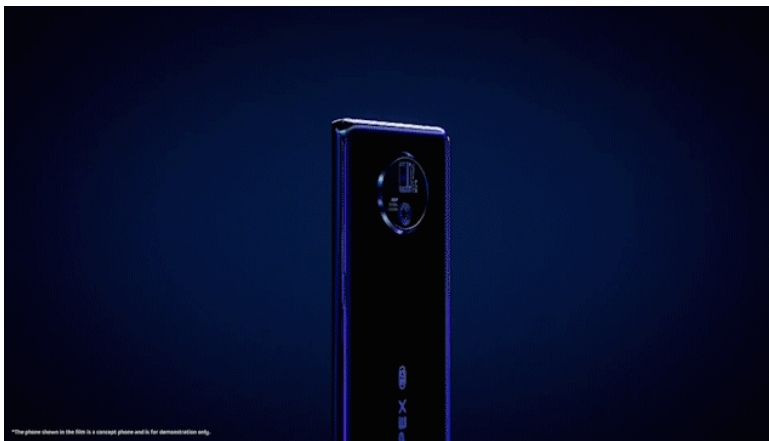

Apex 2020 is equipped with a curved screen that spills completely on the two sides, without a connection port (headset, charging port, sim tray or speakers .) or any physical buttons on this device. The device is also equipped with the most advanced selfie camera technology hidden under the screen, so there is no screen cutout.

Do not have any connection port on Vivo Apex 2020 equipped with super fast wireless charging technology 60W, comparable to the superfast fast charging capacity of the top smartphones on other smartphones.

The battery capacity of the device has not been disclosed. Vivo only said it can charge 100mAh per minute.

Super fast 60W wireless charging technology.

The Vivo Apex 2020 also features a gimbal stabilizer on the main camera for 200% more effective vibration reduction compared to the traditional OIS optical image stabilization that most smartphones today use. The camera of Vivo Apex 2020 is also capable of 5x - 7.5x optical zoom. All will allow users to be able to capture zoomed images with minimal hand shake.
