

Vivo Y50: a smartphone that emphasizes speed, multitasking and durability

As a new smartphone joining the 6 million segment, vivo Y50 offers an attractive choice for young users thanks to its modern design and strong performance for every daily use task.

Design catching up with new trends

Vivo's new smartphone made an impression at first sight with a 6.53-inch Mole Screen that occupies almost the entire front (covering 90.77% of the area). If you are a technology enthusiast, you will soon realize that the design of the device is the general trend of many new high-end smartphones launched in 2020. Vivo's effort is remarkable when it comes to this sleek design. to the majority of users through the Y50 smartphone at only 6 million.

Notification screen is currently the design trend of high-end smartphones in 2020.

The back of the vivo Y50 also creates its own accent, especially attracting young people through the sparkle, changing the subtle shades of the gradient color trend. The embossed light lines focusing on the cluster of 4 rear cameras AI contributes to the youthful and dynamic personality for users. This smartphone has two color options including Mysterious Black inspired by the night sky full of stars and Smoky Purple that refers to the deep ocean.

The sleek back and bright embossed lines make the Y50 vivo look luxurious and trendy

The screen still shows all the typical strengths of IPS LCD technology, including high brightness, bright colors and wide viewing angles.

8GB RAM, 128GB ROM and 5,000 mAh battery for impressive performance all day long

The power on vivo Y50 is similar to some other products in the same segment thanks to the Snapdragon 665 octa-core processor, Adreno 610 GPU. Meeting to play popular games today.
