

Watch extremely fierce and fierce sumo fighting robots

The battle of tiny sumo-fighting robots takes place very quickly, each game is just a few seconds to complete. In order to win against the opponent, the robot not only needs the strength, the ingenuity, the reasonable tactics, but also a little intrigue.

The battle of tiny sumo-fighting robots takes place very quickly, each game is just a few seconds to complete. In order to win against the opponent, the robot not only needs the strength, the ingenuity, the reasonable tactics, but also a little intrigue.

1. Russian new robots can shoot themselves with two hands like humans
2. Unbelievably true, paper blades cut plastic and wood

In modern life, robots are no stranger to us. Not only appeared in modern industries, robots also crept into human life. In Japan, people also set up a sumo competition arena for robots.

Tiny 3kg robots will enter sumo stadium together. The video below will show you that tiny sumo fighters are not only brave, skillful, but also possess the skill of taking down extremely diverse opponents to win, from straight to the enemy, using the nose knocking the opponent away, using the hand to push the opponent to dodge to the side makes the opponent fall .

Robots participating in sumo competitions are divided into two categories: radio-controlled and automatic. The video below captures the automatic robots' competitions in the annual tournament held in Japan posted by YouTube channel Robert McGregor.
