The last time the US put people on space was in July 2011. From then on, if you want to go to / from the US ISS, you have to go to Russia.

The Crew Dragon, which carries two astronauts with only 1 second to take off, will arrive in ISS in 19 hours.

However, depending on the weather in Cape Canaveral the flight may be delayed. If this unfortunate case occurs, SpaceX and NASA will test again at 15h22p on 30/5 or 15h on 31/5.

This historic flight is named Demo-2 and will be broadcast live on the official website of NASA and SpaceX. To follow the history of this world aerospace industry, you can visit one of the channels below.
