

Watch the giant python swallow whole eyes for 10 seconds

The giant python slowly crawled closer to the deer lying motionless, then suddenly it gaped at its prey in a flash that made those who witnessed not be surprised.

The giant python slowly crawled closer to the deer lying motionless, then suddenly it gaped at its prey in a flash that made those who witnessed not be surprised.

1. Giant pythons devoured goats and were caught
2. How big is the biggest snake ever recorded?
3. T-rex dinosaur confronts Titanoboa, the largest giant python in Earth's history

The whole process of the python was wide open, swallowing from the head to the end of the deer's body length in less than 10 seconds. When the python swallowed most of its prey, a man approached and patted him, as if cheering and said that the animal did very well.

After watching this video, most people were surprised by the python's swallowing speed: 'I don't know that it can swallow prey so quickly'.

But there are also many skeptics because the python swallowed so fast. They thought that this video was rewinded, in fact, the python was releasing its bait in surprise when it saw people surrounded.
