

Watch your eyes on the talented graffiti artist turn ugly, tedious walls into stunning 3D works

With meticulous attention to detail about light and darkness, Vile created 'transparent' walls that made it difficult for viewers to recognize them as just a flat wall.

Rodrigo Miguel Sepulveda Nunes or Vile, 34, a Portuguese street artist, created beautiful 3D works on ugly walls, turning them into a work of art that will keep viewers in awe, surprised and impressed.

From the age of 14, Vile began studying street art in graffiti. When he was in college, he also learned to draw cartoons. Vile started becoming a freelance artist in 2007.

Vile also painted many genres, including portraits, but Vile's biggest passion has always been graffiti. He is rated as one of the most talented graffiti artists in the world.

With meticulous attention to detail about light and darkness, Vile created 'transparent' walls that made it difficult for viewers to recognize them as just a flat wall.

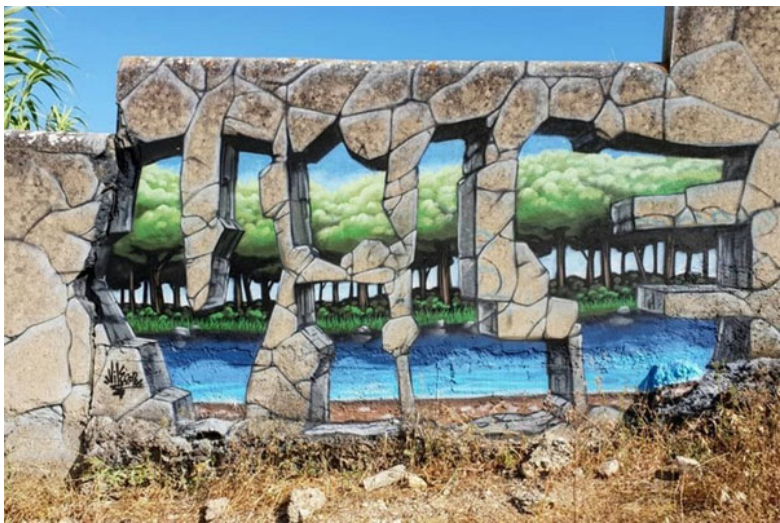

The 3D work on Vile's wall has received a lot of attention online. Here are some unique Vile 3D wall works that you can enjoy.

1. See your eyes in 3D paintings full of real impression from the great street painter
