

Watching the water motorbike and the dive performing a circus like a whale on the sea

Seabreacher is a high-speed submersible boat equipped with a 260hp engine that can perform spectacular acrobatics.

Seabreacher is a high-speed submersible boat equipped with a 260hp engine that can perform spectacular acrobatics.

You can call this vehicle as water motorcycles, ships and submersibles. It can easily turn 180 degrees or rotate 360 degrees, creating extremely nice acrobatics, just like a fish in the sea.

Seabreacher dives to a depth of 5 feet (more than 1.5m) and can jump to a height of 12 feet (nearly 4m) in the air.

Each Seabreacher has a capacity of 2 people, one of which must be a good driver. Sitting in this 'whale' will definitely make you nervous no different than playing thrilling games.

From February 2018, Predator Adventures will begin opening doors for test drive players in London, to experience how it feels to drive a whale. The initial price will be \$ 120.

According to producer Innespace Productions, the engine with a capacity of 260 horsepower allows Seabreacher to reach speeds of 50 miles an hour when traveling on water and 20 miles per hour while under water.

Interested readers can find out more about this car via Seabreacher website here <https://seabreacher.com/>
