

# Way to Android phone in silent mode for a certain period of time

The timed Android phone in silent mode to end the working time, your phone will ring as normal is necessary in some cases, with this procedure you will not need to manually adjust as before.

Usually, during class, working or attending a meeting we will leave the phone in silent mode and then have to re-activate the bell when we get home. In fact, this operation does not take too much of your time, but in some cases like you leave the phone somewhere, it will be difficult to find because you have not simply reset the ringing mode to seek thanks to the cry.

Therefore, the Android phone timer in silent mode to the end of the working time, your phone will ring as usual is very necessary, with this trick you will not need to manually adjust as before half.

1. Automatic timer to turn on Wifi after 1 hour, 4 hours or 1 day on Windows 10
2. How to automatically open a website at a specific time
3. How to turn on / off the music playback automatically when plugging in a headset

## Guide to Android phone timer in silent mode

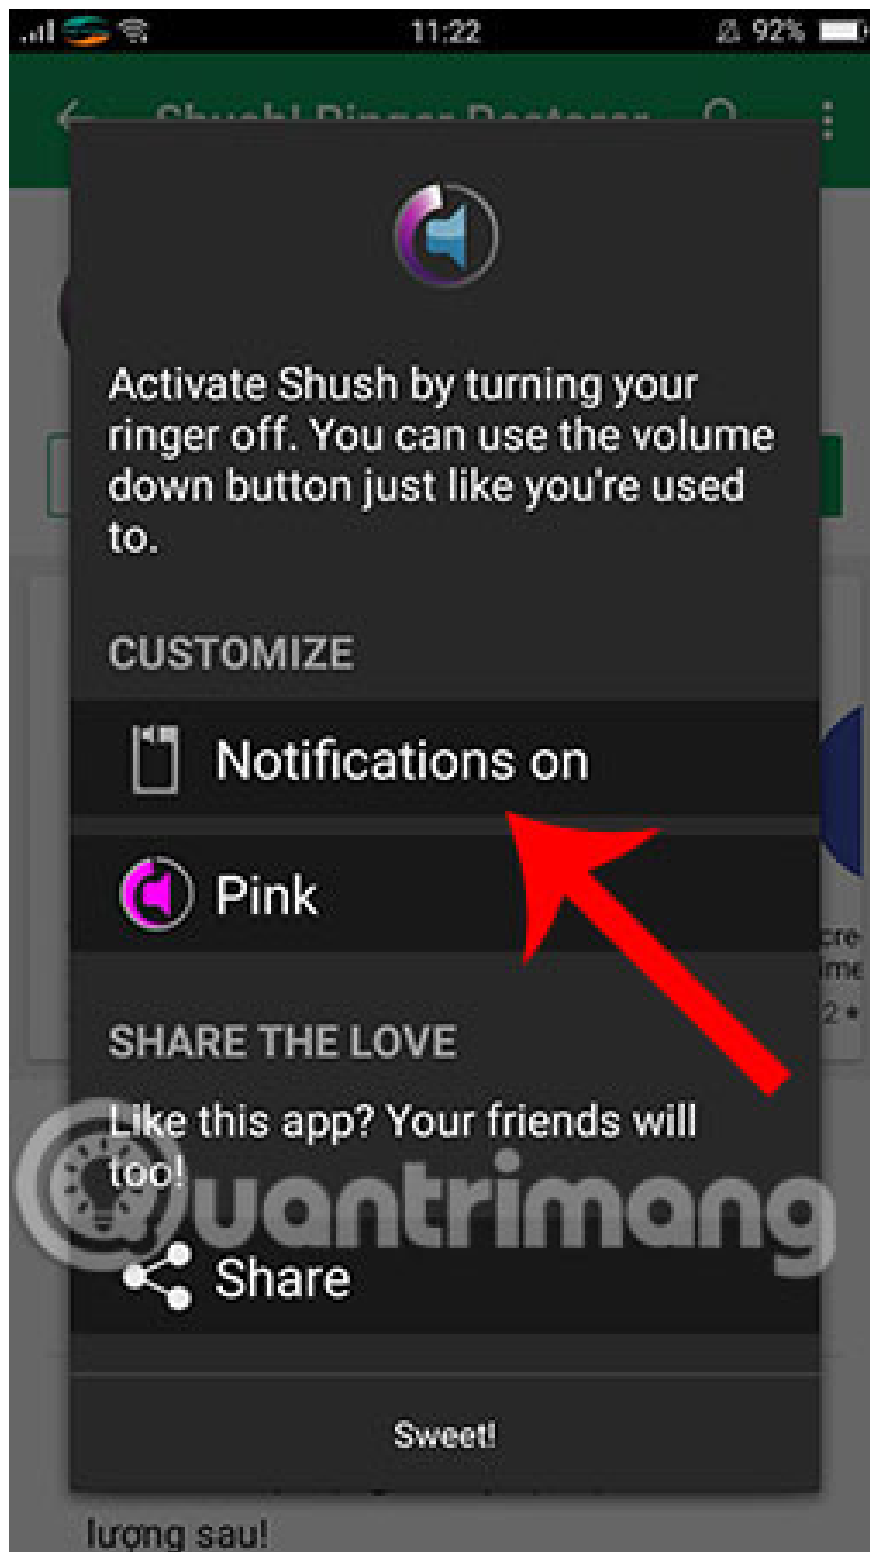

### Step 1:

To schedule Android phones in silent mode, you need help from a 3rd party application called **Shush! Ringer Restorer** . This is a tool that will help you automatically switch to the ringer mode after a certain amount of time, click the link below to download and install Shush! Ringer Restorer for Android device.

1. Download Shush! Ringer Restorer for Android

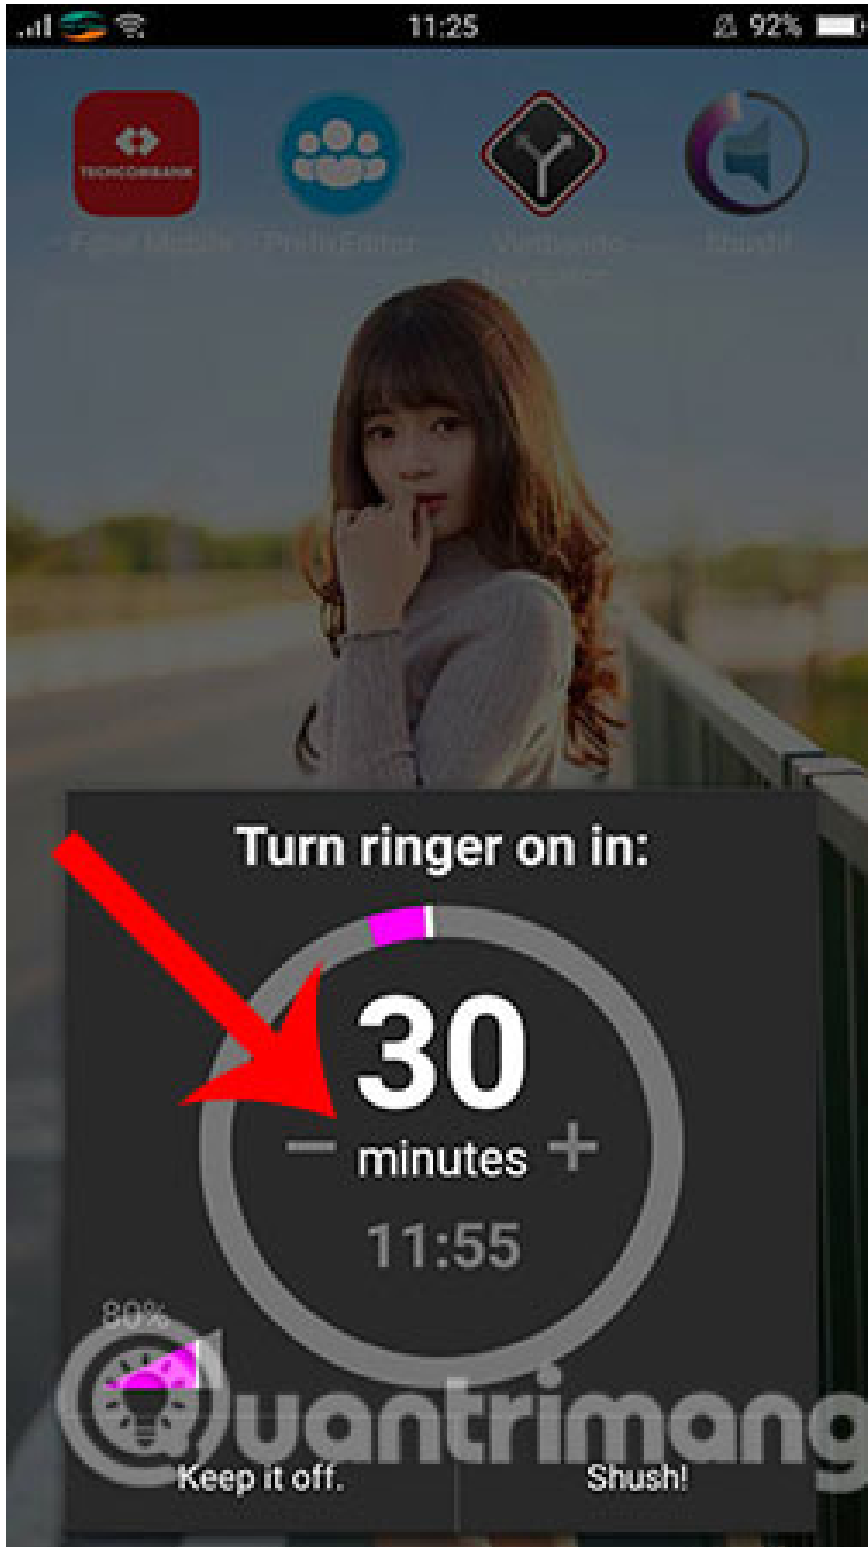

### Step 2:

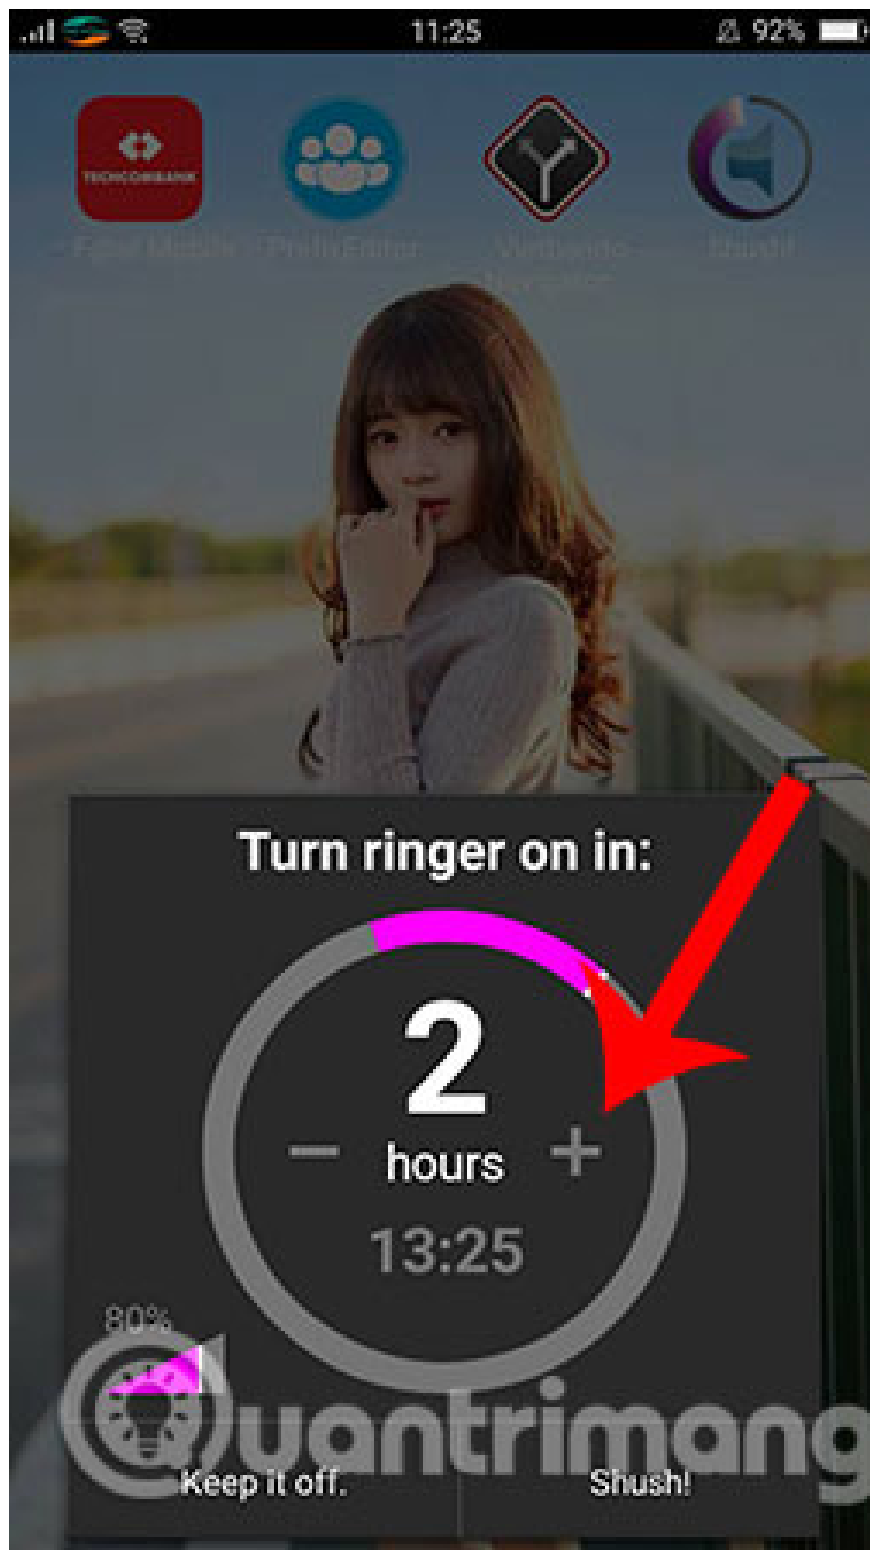

Complete the above step, start up the application and choose to turn on the notification or turn off arbitrary notifications by clicking on the icon as shown in the picture.

### Step 3:

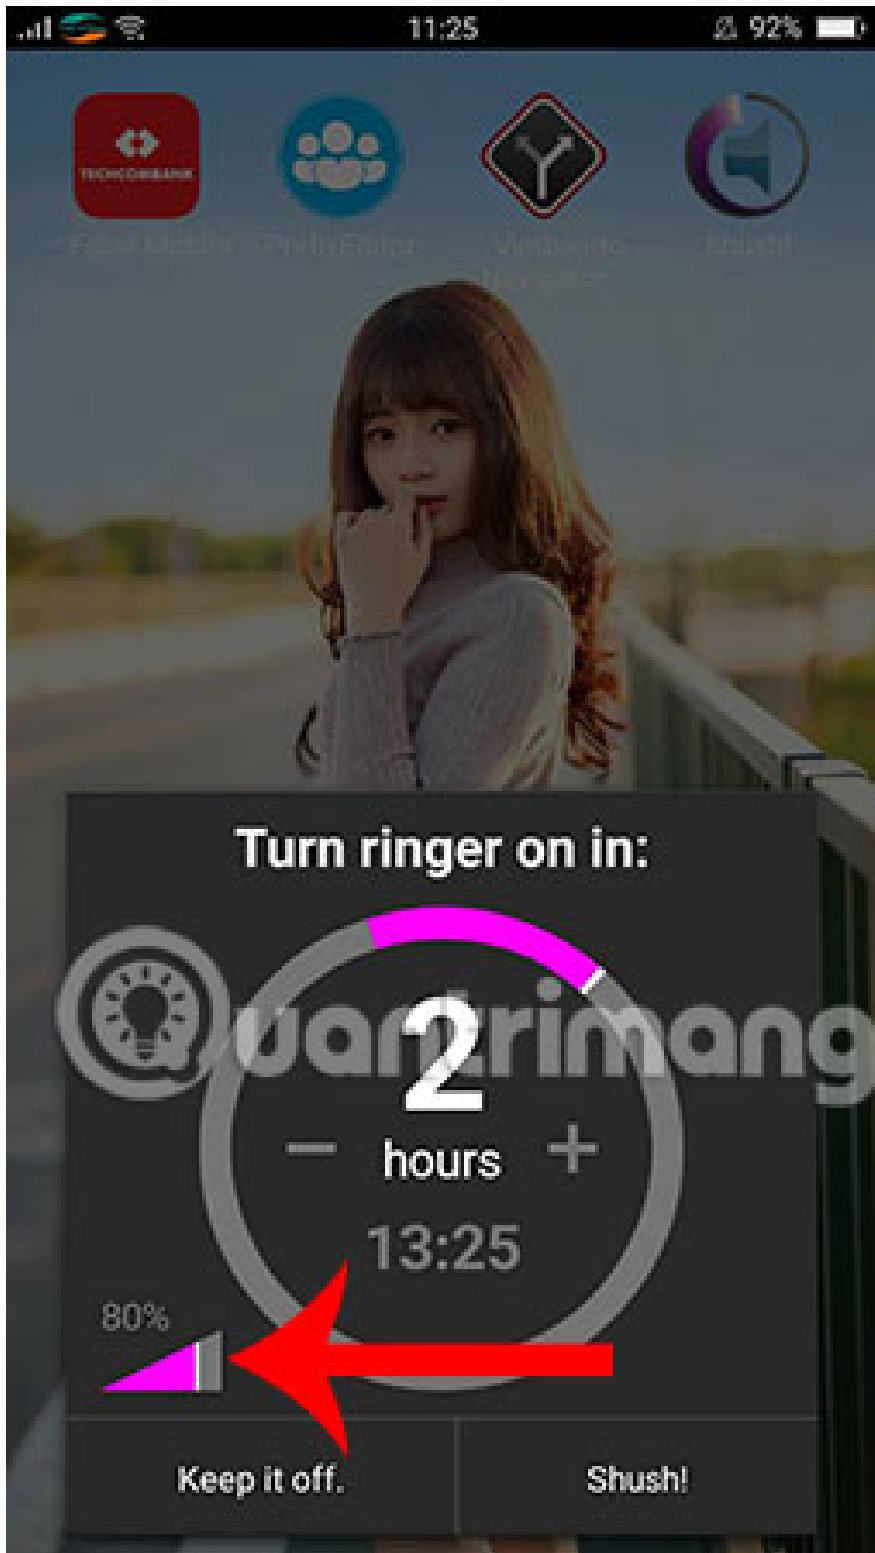

When you set silent mode for your phone, Shush app! Ringer Restorer will automatically turn on and ask you how long it will take to automatically reopen the bell. Click on **the +** and **sign -** to adjust the number of hours you want, maybe 30 minutes, 2 hours or all day depending on your use.

#### Step 4:

Next, click **the sound column icon** in the lower corner and adjust the volume level when you return to ring, then press the **Shush** button ! . At the end of the silent period, your phone will automatically return to the big ring mode you just installed and if you leave the phone somewhere, it will be easier to find.

Turn ringer on in:

2

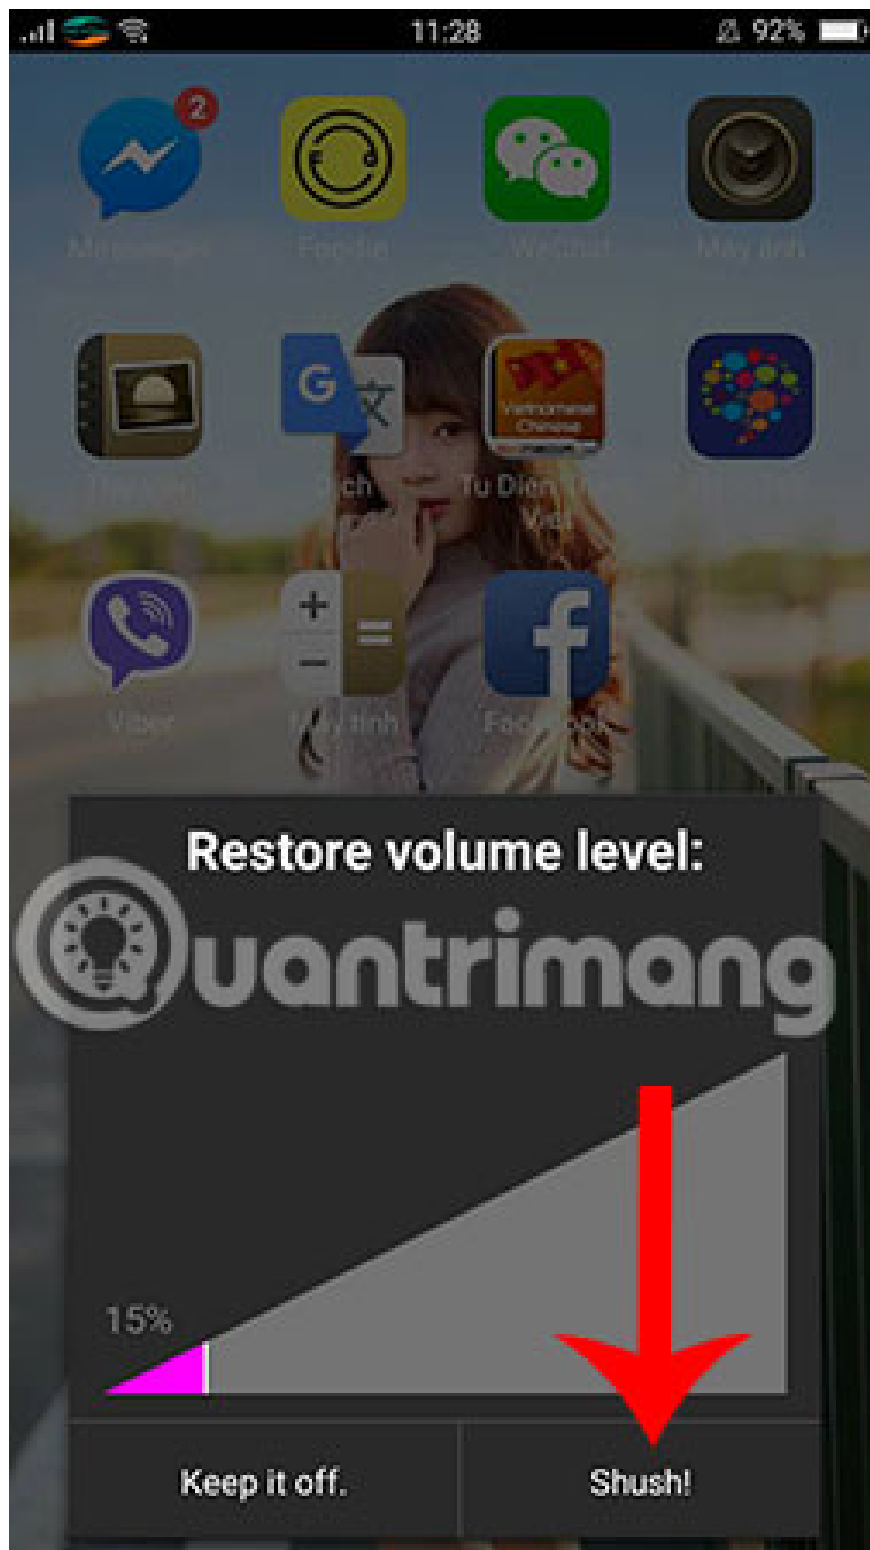

- hours +

13:25

80%

Keep it off.

Shush!
