Especially when people want to transfer documents to you without a Dropbox account. Please refer to a few ways to upload files to Dropbox without login account.

1. How to synchronize specific folders and share folders in Dropbox
2. Collection of the best free online data storage websites today
3. Get more free storage from Dropbox, Google Drive, Skydrive, Ubuntu One
4. Use multiple Dropbox accounts on the same computer

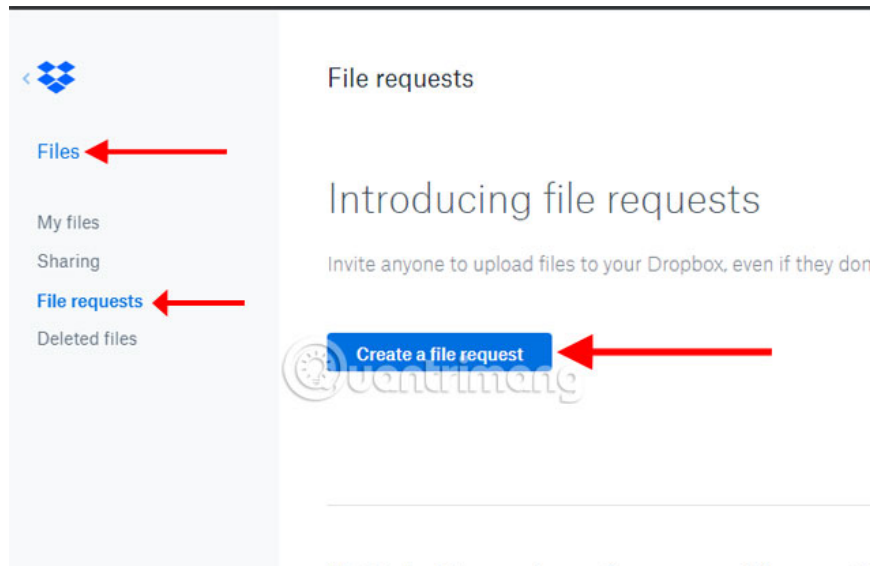

## How to upload files to Dropbox without an account

### 1. Use the Request File feature

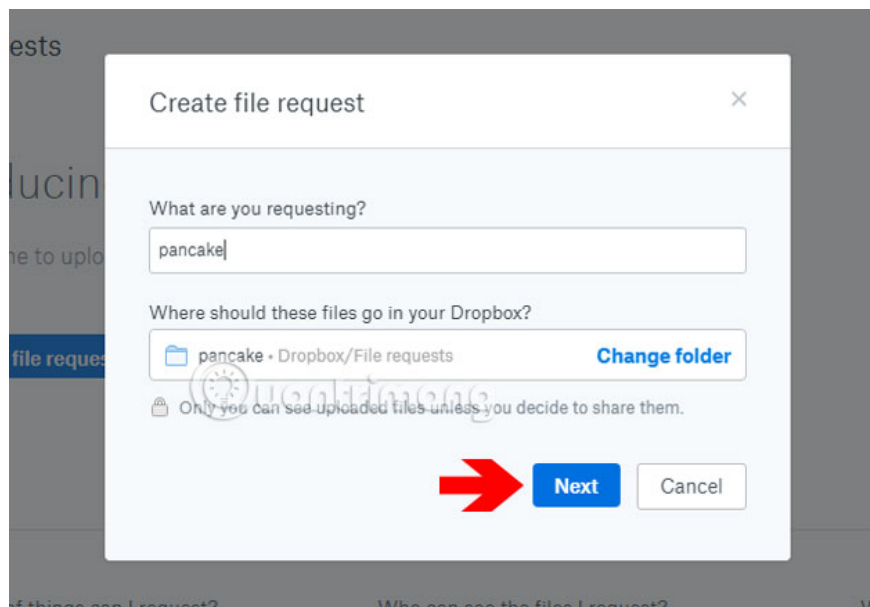

Still know there are many cloud storage services that users can use to transfer data to each other such as Google Drive, Zoolz, Mega, OneDrive, iCloud . But not everyone uses the service together. If you only use Dropbox or your friends only use Dropbox without an account of other services, how do you do it?

Dropbox allows users to receive files from individuals who do not use Dropbox using the **Request Files (Request Files) feature** . To get started, follow the instructions below,

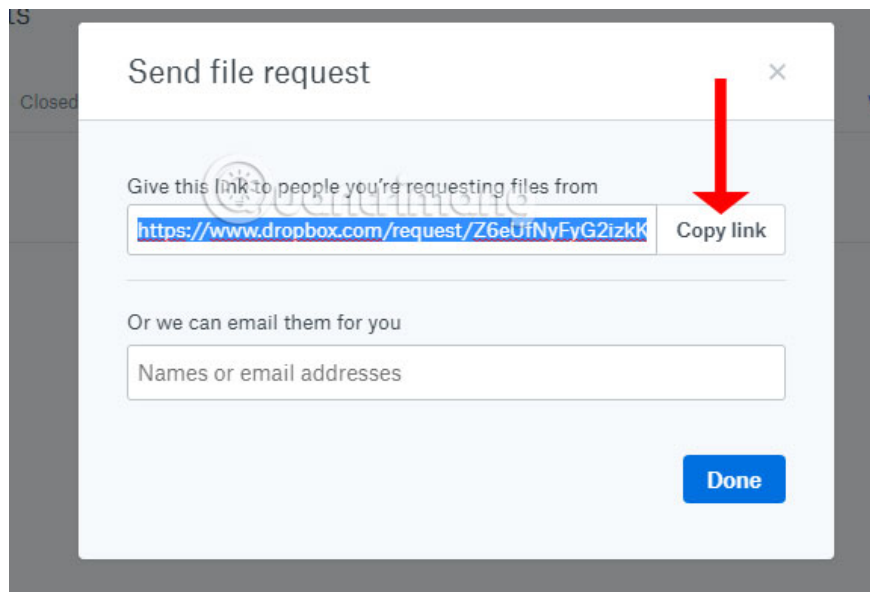

**Step 1:** Log in to your Dropbox account, then select **Files> File request** and click **Create a file request** .

**Step 2:** Next, click on **Change Folder** above and select the folder where the file will be sent, next click **Next** .

**Step 3:** The next step in the **Send file request** window, click **Copy link** and send to the person who wants to share the file for you.

The recipient of the link you just shared when you opened it will have an interface like this, click **Choose file** to select the file you want to share to your Dropbox account.

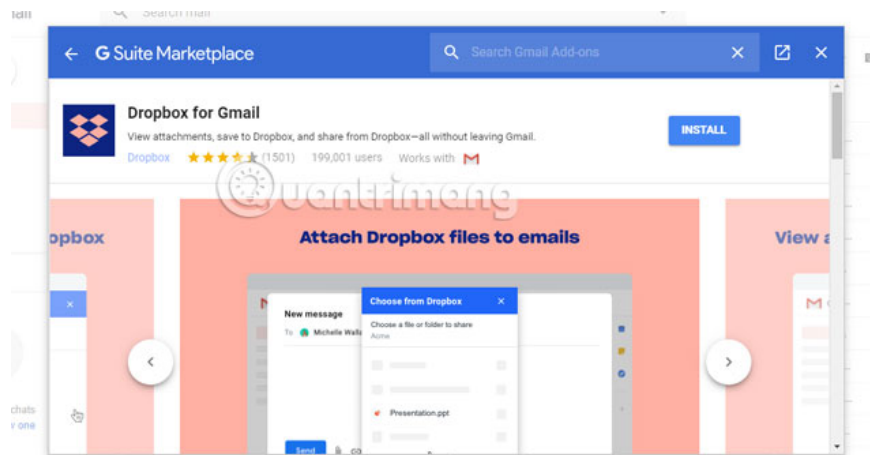

Finally, the shared file will be sent to the folder you selected earlier. You can also save the link so that whenever you want to receive files from people who don't use Dropbox, just share the link with the person who has the document.

Dropbox > File requests > pancake

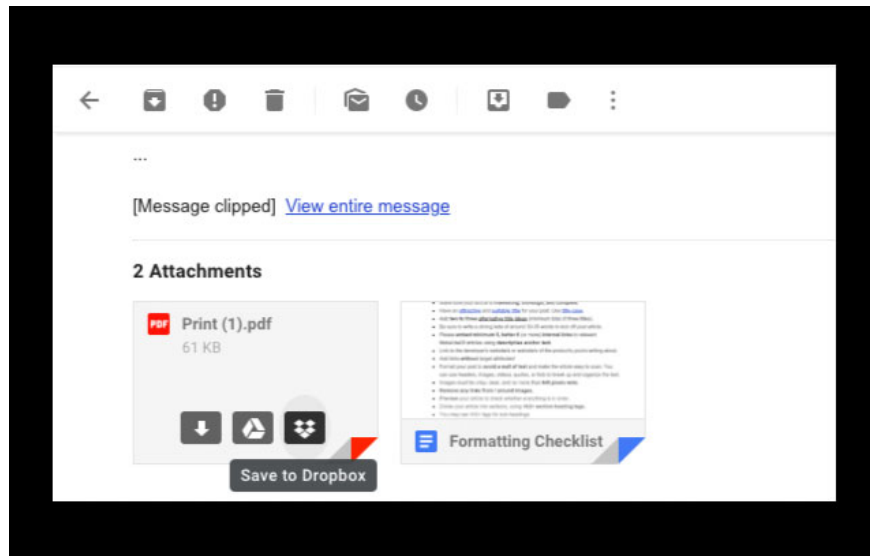

Name ↑	Modified ↓	Members ↓

## 2. Use the Dropbox utility for Gmail

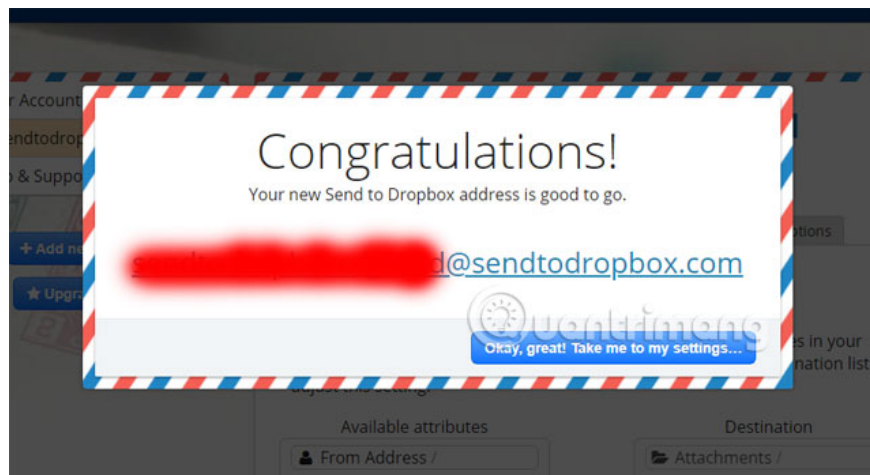

If you use Chrome, you can install the Dropbox extension for Gmail to save your Gmail inbox attachment to Dropbox. Just click the plus sign next to the extension column in the Gmail interface, you'll immediately see the Dropbox widget for Gmail, if not, click the search line and type Dropbox for Gmail.

Next click Install and allow the utility to access your Gmail, then log in to your Dropbox account into the widget in the right column. Now every time you receive mail with attachments from friends and relatives just press **Save to Dropbox** to save to Dropbox.

If you have a Business Dropbox account and a Google Suite account, you can also access a similar cross-platform add-on like the G Suite Marketplace extension.

### 3. Receive data in the form of email attachments

Dropbox only has the ability to transfer files from the Request File feature, but you can get a feature with the email service attached to the Send to Dropbox file. At this service, when you connect the service to your Dropbox account, you will have a new email address.

You can then customize any of your files, or with the people you share this new email with and send the data to you via this email are saved to the folder.

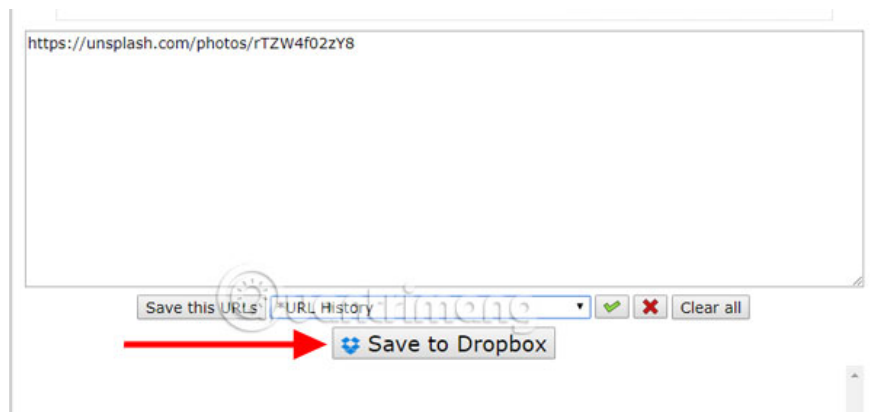

### 4. Automatically save files to Dropbox with IFTTT

You can save, videos, photos, articles or receipts to all types of content into your Dropbox with automation services like IFTTT. Just create an IFTTT account and link it to your Dropbox account, and you also have the option of adding 2 services that work with Dropbox to perform automatic data saving.

The next step IFTTT will let you choose to save the data types, how to save you can see through each step of specific instructions, you can save photos on Facebook, save invoices from Gmail, automatically download videos on Youtube .

## 5. Save the file from the web URL to Dropbox

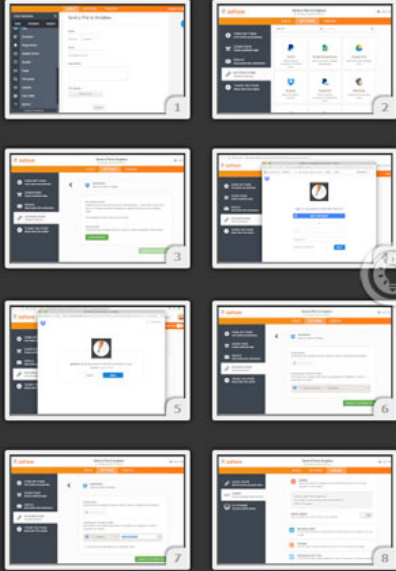

Now suppose if you want to save a PDF file or an online video to your Dropbox folder, try the URL URL Drop Dropbox hosting service. This service allows users to quickly download data by URL, just paste your URL and click Save to Dropbox.

Next, log in to your Dropbox account, select the location of the folder you want to save and click Save. URL to Dropbox supports users to download multiple plays at the same time and also allows you to enter names for the files you are saving. The URLs you use to download will be in the form (<http://www.sample.com/sample.png>).

## 6. Get Jotform feedback and upload files in Dropbox

Wanna do it yourself?

Just follow the instructions below. If you're already a JotForm user, you can skip to step 2 and integrate your existing forms.

- 1. Create your Upload form**

Go to **JotForm Form Builder** and drag a **File Upload** field from the "Form Tools" menu to your workspace. If you wish to collect any other type of information, add the relevant fields from the tools menu.
- 2. Setup your Dropbox**

From the same page, Click "**Integrations**" toolbar under "**Setup & Embed**" tab, select from the wizard "**Dropbox Forms**" from the "**Most Popular**" list. Click the "**Authenticate**" button and a popup window will appear. Login to Dropbox and the integration of your form builder with file upload will be ready.
- 3. Manage your Integration**

After giving JotForm permissions, a message from the wizard "**Authorization successful**" will appear. Click the next button and do the last step. Manage your integration **Folders** to your likings. If you're satisfied enough click the Next button and your Integration will be completed.
- 4. Share!**

All that's left is to have your form on your web site. Go to **JotForm Form Builder** and click "Embed Form" from the options bar. You can embed your form into your website or your Facebook fan page. If you don't have a website, you can also email the form link directly to your clients or colleagues.

Find detailed instructions on completing the integration [here](#).

You can get your Dropbox files directly through a form thanks to Jotform's service, of course in the form provided by Jotform, you will have to have the Upload file in your form field available to users. can send files to me.

Just go to the Jotform website, then click **Create a Dropbox Form** and log in to your existing Dropbox account, then wait for Jotform to set up. Next click **Next** and save the URL form link you designed. You can click Preview to preview your form, under Embed Code, then click Next and Launch Form Builder to start editing your form.

Then, what you need to do is add the information fields to the form from the **Add Form Element** menu. If you want to change the content of the available fields, just click on it and write the new content, for example, **Full Name** may be replaced by **First and Last Name**. Finally click **Publish** and copy the modified form link for the person who wants to send the content.

Based on the above utilities you can see that Dropbox is a very generous data sharing service, these Dropbox-associated services are very reliable and will make sharing your data easy. easier.
