

Ways to help make leather shoes cleaner and more beautiful

In addition to polishing shoes with polish, there are some other simple ways that also help to make leather shoes cleaner and more beautiful

If you already know how to use shoe polish to polish leather shoes, you also need to know that in addition to polishing shoes with polish, there are some other simple ways to help make leather shoes cleaner and more beautiful.

first

Shine leather shoes with banana peel

Shine leather shoes with banana peel

Banana peel contains Tannic Acid, which helps to clean dirt and make the skin more shiny. If used to polish shoes or bags made of leather, make sure they will shine like new.

Rub the inside of a banana peel on your leather shoes and see the scratches slowly disappear. Then use a soft cloth to clean the shoes.

2

Polish leather shoes with polish and vinegar

Polish leather shoes with polish and vinegar

When polishing shoes with polish, you should add a few drops of vinegar to the polish, which will make the shoes more shiny and difficult to collect dust when used.

3

Use lemon to clean shoes before polishing

Use lemon to clean shoes before polishing

Light colored shoes are very dirty, so before polishing, you can use a slice of lemon to clean the stains before polishing.

4

Use toothpaste to brush your shoes

Use toothpaste to brush your shoes

Using toothpaste will help your shoes look shiny and beautiful as new.

Toothpaste acts as a mild detergent, so it will also help clean stains on white leather shoes.

5

Clean and shine leather shoes with cow's milk

Clean and shine leather shoes with cow's milk

Cow's milk can clean leather shoes, help minimize dryness and increase the shine of the leather.

Cow's milk contains a large amount of Vitamins A, B1, B2 and Protein that have the ability to make the skin softer and more vibrant, so you just need to spread the milk on the skin and use a clean towel to rub it on the surface until it's dry. Once the shoes are clean, the leather is soft, then let them dry in a cool place.

6

Clean leather shoes with potatoes

Clean leather shoes with potatoes

Sometimes your shoes don't need to be polished, they just need to be cleaned to get the shine you've polished before.

Use a potato slice to clean scratches and dirt on leather shoes. Use the edge of the potato slice to clean dirt from the seams and edges of the shoe.

Potatoes have a slight moisture content and are mildly abrasive, making them great for polishing leather items.

This is especially good for brown shoes that have a lot of stains after having been previously polished.
