

What about playing games on a smartphone screen folding Huawei Mate X?

Huawei recently uploaded a video recording a great experience when playing Tencent's popular King of Glory game on Mate X, its folding screen smartphone.

Huawei recently uploaded a video recording a great experience when playing Tencent's popular King of Glory game on Mate X, its folding screen smartphone.

When in folding mode, the screen size of Mate X is 6.6 inches with a resolution of 2,480 x 1,148 pixels but can be expanded to 8 inches with a resolution of 2,480 x 2,200 pixels, making the game's scene wider. It is worth noting that the game application is very responsive to the screen expansion, does not affect the game experience. With a broader role-playing game, gamers will have certain advantages and great experiences.

Video test of King of Glory game on Mate X shows the excellent gaming ability of this folding screen smartphone.

Mate X is the world's first 5G folding screen smartphone with an impressive new design launched by Huawei earlier this week.
