

What are AirPods Rep 1 1 headphones? Should I buy and use it?

What are AirPods Rep 1 1 headphones? Why is it popular and widely used in the market today? Let's find out with us through this article!

AirPods are currently a device that many people love and choose. However, the price of genuine Airpods is quite expensive, so on the market today, 1:1 Rep AirPods have appeared to serve the needs of diverse customers. To better understand AirPods Rep 1 1, please refer to TipsMake in the article below.

Introducing the AirPods Rep 1:1 headset

AirPods Rep 1:1 are headphone products with the same design and features as genuine AirPods headphones manufactured by Apple. Products have similarities from equipment, boxes to manuals.

Picture 1 of What are AirPods Rep 1 1 headphones? Should I buy and use it?

This type of headset will not have the same quality production process and strict testing as genuine AirPods. Because the price of AirPods Pro Rep 1:1 is quite cheap, many people choose it.

Currently, there are many types of AirPods Rep on the market, but each type has different characteristics. The biggest difference between these types is the chip used. The 1:1 Rep AirPods will mainly use the Louda audio chip, while the genuine AirPods chip is Apple H1.

Compare AirPods Rep 1 1 with genuine AirPods

Although it has a design that is 99% similar to the genuine version, AirPods Pro Rep 1:1 still has some small errors and risks that may be encountered during use. The difference between AirPods Rep 1:1 and genuine AirPods can be mentioned as:

About the selling price

AirPods Rep 1:1 has a much cheaper price than the genuine product. The average price of this type of headset is only about ? of the selling price of the genuine product. That's why AirPods Rep 1:1 is very popular on the market.

Product durability

AirPods Rep 1:1 versions will often have much less durability than genuine headphone products. Because the raw materials and production process of AirPods Rep 1:1 do not meet the same standards as those in Apple's factories.

About design

AirPods Rep 1:1 has a box design that is similar to the genuine product, but in terms of finish, there are still some defective details. The easiest thing to notice is that the joints and hinges are not sturdy, loose and rickety, and not as well finished as the genuine product.

Small details such as the text printed on AirPods Pro Rep 1:1 are also not sharp. At the same time, the metal edge in contact with the charging port is also rougher and thicker, not as shiny and slender as the genuine product.

Water resistance

Genuine AirPods Pro are specially designed so they are quite water resistant, limiting light rain and sweat when in use. Users can feel completely secure when using it in daily activities. However, AirPods Pro Rep 1:1 will not be equipped with this advanced feature.

About sound quality

Sound quality is one of the factors that most clearly shows the difference between Rep and Real products. AirPods Rep has sound quality similar to the genuine panel up to 95%. However, the ability to convert negative bands and process trable bands of Rep 1:1 products is still not comparable to genuine Apple products.

About connection technology

Genuine AirPods, thanks to being equipped with exclusive H1 and W1 technology, provide super fast and extremely stable connectivity, but for AirPods Rep 1:1, that is not the case at all. Besides, when using genuine AirPods, when you take the headphones out of your ears, the music will still play automatically.

Used Time

AirPods Pro Rep 1:1 only has a usage time of about 2-3 hours, much less than genuine AirPods when the usage time is up to about 5-6 hours.

Warranty Policy

Warranty policy is the biggest difference between genuine AirPods and 1:1 AirPods Pro Rep. Because it is only a Rep product, of course AirPods Pro Rep 1:1 will not have a warranty policy from the store. If there is any damage during use, it is difficult to resolve.

Instructions on how to identify 1:1 Rep AirPods with genuine AirPods

To identify 1:1 Rep AirPods with genuine AirPods is also very simple, you just need to rely on the following factors:

Based on the box

For genuine AirPods products, they will be contained in a square box with sharp edges, the box is not dented, and the printing is clear. On the contrary, for the AirPods Rep 1:1 box, even though it has been manufactured similarly to the genuine product, the printing quality, ink and color of the box will not be as sharp as the genuine products.

Accessories in the box

The easier point to recognize is that the accessories of AirPods Rep 1:1 are not sturdy and quite loose. The Rep product's user manual also only has a single Chinese version. Meanwhile, genuine products have instructions for use in many different languages.

Should I buy and use AirPods Rep 1:1? Why?

With the unique characteristics of AirPods Rep 1:1, you should only use it if you have knowledge of technology. At the same time, if you use AirPods Rep 1:1, you should only use it for experience purposes, it cannot meet your long-term use needs. We do not encourage you to use these products because they often have unstable quality and do not have a clear warranty. Therefore, it is best for you to choose to buy yourself a genuine AirPods for long-term use.

Epilogue

Depending on your needs and finances, choose the appropriate type of AirPods. Hopefully the above sharing from TipsMake will help you better understand AirPods Rep 1:1. If you have any other questions, please leave a comment below this article.
