

What are the 4 best VPNs for streaming in 2021?

We all know that the most popular media streaming sites are from the US. We are of course talking about Netflix, Amazon Prime, and dozens of others.

When one of these sites may be accessible to foreign countries, access will be limited to only a small amount of content in the library. As a result, VPNs have positioned themselves as the solution of choice for overcoming these types of geo-blocking barriers on the web.

A reliable VPN for streaming will not only unblock multimedia streaming websites, they will go far beyond. Check out this article to discover the best VPNs for streaming in 2021. They are equipped with unlimited resources and have a proven track record of offering high speeds.

How to choose the best VPN dedicated to streaming?

Let's start by saying what the VPN meaning is. It is a service that helps protect every users Internet connection and their online privacy. It also offers a tunnel that is encrypted for data, protects their online identity by masking their IP address and offers optimized servers for streaming media services. Do you want to watch BBC iPlayer, Hulu, Netflix, or Amazon Prime Video? Discover the best VPN to unblock these services.

The top-rated streaming VPNs must combine lightning-fast connection speeds with airtight security. You should choose one with fast and reliable connection for constant streaming and avoid dreaded buffering. A software with a high number of servers will also be a big advantage. You should opt for a service with fast and efficient Customer Support, available 24/7 on live chat in case you have trouble getting your device to work.

Why do you need a VPN for streaming?

Simply put, you need a VPN if you want to get the most out of your favorite media streaming service. This type of software can help you expand your subscription library, and it can also unlock new types of streaming services. When using a VPN, you will access restricted libraries. However, be aware that not all VPNs will do the job. Depending on the media streaming service you wish to access, you will have to make a choice. Keep reading to learn more.

TOP 4 VPN for streaming services in 2021

When doing research on VPNs online, you will quickly be overwhelmed by hundreds of available options. And many of them will claim to be the best solution for streaming, even if they do not back up that claim in practice. So, to avoid buying an inappropriate VPN, you need a trusted guide that can provide you with an objective point

of view regarding these types of software.

Here's what you really want to know. Discover the 4 best VPNs for streaming in 2021!

ExpressVPN

Picture 2 of What are the 4 best VPNs for streaming in 2021?

ExpressVPN is by far one of the best VPNs on the market. It is fast, secure, and easy to use. Furthermore, you can get it risk-free for 30 days. This excellent software allows users to access almost any streaming site you can imagine. Even better, when you are watching your favorite programs with ExpressVPN, it enhances your experience by reducing lags and bypassing all kinds of throttling.

CyberGhost VPN

CyberGhost VPN is a very good addition to the list. The tool comes with some cool built-in features, like the built-in anti-malware feature, acting just like an antivirus would. There is also a Kill Switch to prevent your unencrypted data from being tracked by your ISP or anyone else if any of the 7,000 servers fail. Its server network is spread across 90 countries, with many servers optimized for streaming in the US and UK.

Furthermore, CyberGhost uses state-of-the-art encryption protocols to secure all data and has a zero-log policy in place.

NordVPN

Netflix, Hulu, Amazon Prime, BBC iPlayer, Disney+, HBO Max, YouTube, NordVPN can unblock them all! The provider really has the capabilities to back up its reputation, easily unblocking a range of streaming services from abroad. On top of that, the service comes with something you will not find anywhere else. The flagship feature of this provider is its dual encryption standards. Instead of routing your web traffic through a single server, it does so with two secure servers.

This can be useful when you need a little more privacy. However, it also means that you should expect some slowdown at times, but that is not a real problem for most users.

Surfshark

Surfshark offers many of the features of the other two providers above, but at a slightly lower price. If you are willing to make a longer-term commitment, the cost drops to \$2.45 per month. That is great value for money for a VPN that's still very good for streamers.

With more than 3,200 servers now, spread over 60 countries, Surfshark gives you plenty of options to enjoy. The most important thing is that this VPN unblocks virtually all popular streaming sites, including Netflix US, BBC iPlayer and Prime Video. Surprisingly, it also works very well with Hulu, which is known for its harsh anti-VPN measures.

Moreover, this VPN ranks among the best in terms of speed and performance, making it a perfect choice for HD and 4K streaming.
