What country is Sumika's air cooler?

Sumika is a brand from Japan. The products of this brand are usually produced at factories located in: Malaysia, China, Thailand, Vietnam . Besides producing cooling devices such as air conditioners and air conditioners, Sumika also launched other products such as washing machines, freezers, tree fans, aluminum ladders . Thanks to being produced on modern and advanced technology lines along with selected components. Therefore, Sumika's products are always favored and appreciated by consumers.

Sumika air coolers are good?

If you put it on the table to count and compare it with other big brands, Sumika has not had a wide range and is quite modest when it is not widely known. The question for many customers is: Is Sumika cooler good? Let's analyze and give an answer!

Most of the Sumika coolers with components manufactured in Malaysia and assembled in factories in Vietnam should ensure the best quality when coming to consumers.

Here are some features of this product line:

Modern design, luxury

Possessing a modern and luxurious design, Sumika coolers are suitable for all spaces to help the interior where it has more comfortable face. In particular, most machines are equipped with 4 more wheels to make the move more convenient.

The case is made of high quality materials with high durability and easy to clean when needed. In addition, the device is also equipped with a remote control to help you feel more comfortable every time you use.

Intelligent cooling system, effective cooling as air conditioner

Sumika coolers operate under a steam-cooled mechanism, with the most natural cooling functions that make the space cooler and more pleasant during hot summer days.

Besides, the combination of the regime of creating ion, bactericidal and modern air filtration technology helps the room space become more clean and safe with the health of the whole family.

Cooling principle on the mechanism of heat exchange between hot air and water at cooling pad cooling pad, no mist spraying to create moisture will not damage electrical and electronic equipment in the house.

Operates with large capacity

With a large operating capacity, when the temperature rises in the air, it will quickly absorb the heat. Therefore, the hot air flow will be reduced very quickly, creating a comfortable feeling for users immediately.

Safe for human health

If you use air conditioner, you will worry because the skin is dry and lacking moisture, then the air cooler will not happen at all. Air cooling machine Sumika works with steam-cooled mechanism without mist, does not create moisture, does not produce toxic substances, so it is absolutely safe for health, especially families with elderly people and children.

Suitable for open space

Different from the air-conditioner when operation needs to close all doors, **the Sumika cooler** is suitable for open spaces to increase air convection. Products suitable for spaces such as dining room, kitchen, living room, restaurant .

Note when using Sumika cooler to be more durable and efficient?

In order to keep the coolers products durable and maximize their features, you need to pay attention to the following basic points:

1. In the process of use should not close the door to get better air circulation. In addition to the ability to absorb heat, the machine also increases the convection ability to push the old air out.
2. Place the fan in a well-ventilated position, face with the wind, so keep it in a place with a lot of wind.
3. Do not allow the blower directly too close to the body, you should turn on the air reversal function to cool the air faster and ensure health safety.
4. After using time should be cleaned periodically 1-2 months / time to avoid bacteria, mold.
5. Pour a sufficient amount of water into the container, preferably about 1/2 or more and not exceed the prescribed level.
6. When starting the fan, choose cool mode: Put cold water in a water tank, add dry ice or ice cubes, wait for 15 minutes, the room temperature will decrease and increase the best cooling effect.
7. After directly catching the wind for about 15-20 minutes, choose the rotation mode for the fan to cool evenly and open the room.

8. In addition to manual humidification, it is recommended to use Humidity Control to control the humidity and ion function (if any) to clean the air.

Which Sumika air coolers are cheap cheap today?

Here are some samples of Sumika air coolers being genuine distributed by META.vn:

Air cooler Sumika K500A (A500A): Sale price - 5,800,000 VND

Specifications:

1. Warranty 12 months
2. Brand: Japan
3. Made in China
4. Cooling area: 30 - 50m²
5. Capacity: 180W
6. Water tank capacity: 40 liters

Air cooler Sumika K55A: Price - 4,500,000 VND

Specifications:

1. Warranty 12 months
2. Brand: Japan
3. Made in China
4. Noise level: ? 60dB
5. Cooling area: 40 - 50m²
6. Capacity: 150W
7. Air flow: 5500 m³ / h

Air cooler Sumika K250 - Price: 3,800,000 VND

Specifications:

1. Warranty 12 months
2. Brand: Japan
3. Made in China
4. Capacity: 140W
5. Wind speed: 3 speeds
6. Air flow: 2,000 m³ / hour
7. Cooling area: 20m² - 30m²
8. Water tank capacity: 30 liters

Air cooler Sumika K500 (A500) - Price: VND 5,500,000

Specifications:

1. Warranty 12 months

2. Brand: Japan
3. Made in China
4. Noise level: 53dB
5. Air flow: 5,000 m³ / h
6. Wind speed: 3 speeds
7. Power consumption: 180 W / H
