

What do you know about software technology P6

The following Software Technology quiz of the Network Administrator will provide you with knowledge about software including concepts, development models, activities, techniques and methods, and at the same time understand the apply software technology in software development.

1. Question 1. An essential addition to transforming or mapping transactions to create a full architectural design is
 1. Relationship diagram - entity
 2. Data dictionary
 3. Describe the processing for each module
 4. Test-cases for each module
2. Question 2. Which interface design principles do not allow the user to control the interaction with the computer
 1. Allow to be interrupted
 2. Allows interactive undo
 3. Conceal the technical nature with ordinary users
 4. Only provides a hard way to determine when the task is completed
3. Question 3. Interface design principles allow users to remember less
 1. Identify visual shortcuts
 2. Express information in a progressive way
 3. Set the default cases to make sense
 4. All items above
4. Sentence 4. Consistency of default interface
 1. Input techniques are similar throughout the application
 2. Each application must have a separate look and feel
 3. Navigational methods are sensitive to context
 4. Both a and b
5. Question 5. Which model shows the end-user (profile) image of the computer-based system
 1. Design model
 2. User model
 3. User model
 4. System awareness model
6. Question 6. Which model shows the system image in the end user's end
 1. Design model
 2. User model
 3. System image
 4. System awareness model
7. Question 7. Which model shows the look and feel image for the user interface and support information
 1. Design model
 2. User model
 3. Model image system

4. System awareness model
8. Question 8. Which frame operations are often not associated with user interface design processes
 1. Estimated price
 2. Build interface
 3. Rule the interface
 4. Analysis of users and tasks
9. Question 9. Which approach to analyze user task analysis in user interface design
 1. Users indicate preferences through questionnaires
 2. Based on the opinions of experienced programmers
 3. Research related automated systems
 4. Observe user actions
10. Question 10. Common design problems stand out in most user interfaces
 1. User history connection (profile) and function shortcut
 2. Error handling and system response time
 3. Decide to display images and design icons
 4. There are no items

You finished reading the article "**What do you know about software technology P6**" edited by the [TipsMake](#) team. We hope this article has provided you with many useful tech tips and tricks.
