Karaoke head

Karaoke player has the main function of playing music, melody, displaying pictures and lyrics. There are two main types of karaoke players: computer karaoke heads and digital karaoke players. Computer heads use disks and USBs to store the number of songs while digital heads use hard drives with a larger capacity, which can store more. High-end products now also integrate more modern functions such as running the operating system, with smartphone control systems, tablets due to wifi, bluetooth connectivity. Each type of karaoke player will have its own advantages or disadvantages, from which you should consider choosing according to use needs, economic capabilities as well as your preferences.

On the current market, famous brands offering karaoke players are Arirang, Hanet, Acnos, Viet KTV, Nanomax,

The price of karaoke players ranges from 1 million to over 10 million, many price segments for your reference and choice.

Amplifier karaoke

This is a 'booster' device, amplification and alignment of sound with built-in gold maker, extremely important filter in karaoke, supporting the audio signal to the speakers clearer and more vivid. The most important thing you need to pay attention when choosing to buy amplifier is the capacity, this index must be compatible with other audio devices in the karaoke set, especially the loudspeaker, in order to fully utilize its performance. Specifically, the power of the amplifier must double the capacity of the karaoke speaker and vice versa has an impedance equal to half of the speaker impedance. You can adjust the resonance, amplification, and bass of the microphone. When increasing the volume, a good amplifier device, its power will show the accuracy, tension, speed and depth of sound.

Some big brands that provide good quality amply products are Arirang, Jarguar, Denon, Nanomax, Toa, .

Amply prices in the market range from 1.5 million to over 10 million, differentiated prices for customers to choose according to economic capacity.

Depending on demand, consumers can add or replace amplifiers with a set of + Power boosters. The power pusher is a device that amplifies sound to the speakers while the mixer (also called digital / mechanical reverberation) has the function of adjusting the sound quality, removing and limiting the noise and sound. the sound is not as valuable as the howls, hissing in the microphone effectively, for a more subtle, more vivid audio output.

Karaoke speaker

Certainly a complete karaoke set is indispensable for karaoke speakers - the sound generator, which transmits sound to the listener. A good set of speakers is the product for great sound quality, true and vivid. To choose a suitable karaoke speaker, you first need to pay attention to the room area to choose the right capacity, then based on the speaker capacity to choose the right amplifier. The speaker has many types with metal drivers, hard paper

drivers, . For some high-end high-end models, it also has built-in subwoofer, convenient bass speaker.

Major brands specializing in providing karaoke speaker products: SoundMax, Arirang, Acnos, Guinness, Nanomax, Paramax, .

Currently karaoke product line on the market is also classified into many segments, from cheap to high-end, the price ranges from 1 million to 17-18 million. Products at high prices are usually a full set of speakers with karaoke speakers with bass, detailed subwoofers, extremely good sound quality, worthy of its price.

Micro karaoke

Equally important device in karaoke is a microphone. This is the part that receives audio of the user, converts the sound into an electrical signal, then transmits it to the amplifier to process it, then finally passes it to the speaker to form the sound associated with the music. Good mic quality is important because it directly affects the sound results, the sound you have or the smooth, clear sound is not dependent on the microphone. There are two types of karaoke microphones are wired microphones and wireless microphones. With today's modern trend, wireless microphones are preferred because of their convenience, ease of movement without limiting the distance as wired microphones. Each type has its own advantages and disadvantages, so you can refer to your needs.

The brand provides good quality karaoke microphone products: Arirang, Music Wave, Guinness, Acnos, .

Microphone prices range from 200,000 to 6 million and usually wireless microphone prices will be marginally better than wired ones.

Subwoofer

Subwoofers, or subwoofers, are devices that support the main loudspeaker, which can represent low frequency sound ranges, frequencies below 200Hz. These are sounds that are warm, deep, thick, extremely solid and are the foundation for the sound system. These sounds bring true feeling, slightly stimulating to the listener's ear. Some high-end karaoke speakers can be integrated directly into the subwoofer in the body or come with the kit. Family karaoke units may or may not, but for professional karaoke sets in the theater, there must be enough products for this subwoofer.

Attendance for some good quality subwoofer brands: Jamo, Arirang, DMX, Klipsch, Nanomax, .

If you need to buy subwoofers, the current price ranges from 3 million to over 10 million, even high-end products with prices up to nearly 20 million, depending on financial capacity. and your needs that choose the right product for you.
