## 1. What is FPS game?

FPS (First Person Shooter) is a first-person shooter game genre. In this game genre, gamers can play the main character through the first perspective and help players have the most authentic experience.

The first title of the FPS series was Battlezone, which was released in 1980 on the Atari console. The game takes players into a battle tank with the task of destroying all enemies on the battlefield. It is the new gaming experience that gives Battlezone a new style and is the inspiration for future games.

## 2. Advantages and disadvantages of FPS games

### Advantages

When we experience FPS games, we feel the authenticity as being immersed in the characters in the game with an immediate view. This game genre is also quite simple with the main goal is usually "search and destroy", players can easily get acquainted after a few basic manipulation instructions. The FPS game also trains players the ability to respond quickly and respond well because the ability to aim and control the environment in the game is limited by visibility. Young gamers often play FPS games better than adults because of their quick reflexes and sharp eyes, easily detecting opponents in sight.

The weapons in the FPS game are quite diverse depending on the context of the game. With the ancient FPS war game products, users will be able to use melee weapons such as (ax, sword, knife, mace .) or bows and arrows. Modern FPS-themed FPS games will allow players to use a more extensive arsenal such as pistols, snipers, mortars . along with the ability to mod weapons (mount silencer, grenade launcher, long-range viewfinder .). For games that use magic skills, it is less made in the first view because of limited visibility and control than games using guns or melee weapons.

## Defect

With many advantages when talking about the FPS game series, besides that, we can see the disadvantages such as: limited visibility, frame rate which greatly affects the accuracy when playing games, especially for the game. shooter titles and some other restrictions.

Besides, we should not play FPS games for a long time because changing the frame, moving the continuous rotation angle will cause us dizziness, dizziness and headache. Therefore, gamers with poor health or vision problems will have difficulty playing FPS games.

Due to the perspective on the FPS game that simulates one's vision, we will be limited by the narrow viewing angle and when we play, we must be observant to detect the opponent in sight.
