Thanks to the franking machine, you can simply affix a postage code and have it delivered to your local postal box. With a franking machine, your mails can also get the printed barcode instead of the conventional stamp as well as downloading and storing postage funds that can be an aid in your choice of mail services and special services.

The last time your staff waited at the postal office to have all your mails and packages weighed was yesterday, today, you are free to get yourself a franking machine and enjoy job efficiency as you deserve. Since you are eager to use a franking machine from FPmailing.co.uk, perhaps you wouldn't mind knowing that sometime in 1884, Engle Frankmussler gave the world an invention that would curtail the inconsistencies of postal services.

From missing a mail destination to inappropriate postage rates, etc. Over the years Frankmussler's innovation has received several modifications into the digital affixing machine used today but the name remains, Franking machine.

So, how is it used?

Here Is How Franking Machine Works

Generally, franking simply means paying for your mail, and franking as your mind is guessing means the appropriate postage/stamp rate of each mail/parcel and more. The process is pretty the same but with variations in the machine types and sophistication.

So, here is a guide to prepare your mind for the ease that awaits your business with a franking machine.

1. **First, you need to weigh it:** Franking is all about paying the right postage rate and every franking machine comes with a scale to help you achieve that. So, simply locate the scale and place the parcel on it, get the exact weight of the parcel, and know how much postage the mail needs.
2. **Determine the letter size and the services for the parcel or mail:** Depending on the content, you can choose the services that match.
3. **Determine the postage costs:** Royal Mail is responsible for franking machine services and they offer discounted prices for their subscribers. So, when you weigh the parcels and envelopes, the prices you get comes with discounts and helps you get a fair and accurate postage rate for every mailing.
4. **Aids customization:** On the franking machine, business owners can easily enter their logo or whatever message they wish their customers/clients to see on the machine and it will be printed on the envelope. Meaning, the franking machine offers more than prices for business owners with this provision of customization for easy identification.
5. More so, you can print any additional information you want on the envelope before dropping it at your local post box or have it taken. All you need is to follow the prompts on the machine, make your selections, and have them all printed on your envelope.

Here are some reasons, you need to get a franking machine if you haven't

1. **Convenience:** Nothing beats the freedom of sorting, packaging, and sending your mail at ease. So, ditch the queue at the postal agencies and get frank prices with a franking machine.
2. **Flee the stamp chore:** You don't need the chore of affixing stamps to each mail when a postage meter can take all the labor
3. **Security:** No more mess with stamp losses or dollar loss when every dime is safe in a postage meter
4. **Cleaner services:** Your correspondence and parcels now arrive cleaner and professional, don't you like that?
5. **Quick delivery:** Postage meters are dated and postmarked, meaning that they receive less handling at the post office. With this, they are dispatched quickly.

Finally, keep in mind that every item you frank must be posted on the same day, and in the local area while ensuring that the franking marks are placed on the top right part of the envelope. Additionally, if you are using stamps, do not frank the envelopes. Lastly, get a license from Royal Mail for your franking machine and learn its rules for smooth use of the machine.

Times and technology keep making things easy for everyone and with this helpful innovation, your correspondence and other mailing activities can only get better.
