Learn about ion hair dryers

What is an ion hair dryer?

Today, almost every family has at least one hair dryer in their home. However, most of them are conventional products, only drying function to help dry hair quickly. This also explains why when people hear the phrase 'ionic hair dryer' many people seem quite strange.

Ion hair dryers or negative ion hair dryers are similar in style to the hair dryers we use, but in addition to drying the hair, it can create negative ion particles to protect. and moisturize the hair. Negative ions are referred to by scientists as 'vitamins in the air'. Because of its excellent health effects, negative ion technology is used in many health and beauty devices.

Principle of operation of the negative ion hair dryer

Negative ion hair dryers operate on a fairly simple principle. As soon as we wash our hair, the water that is deposited in our hair is positively charged ions. During operation, the ion hair dryer will create negative ions to disrupt the molecular structure of water, causing the evaporation process to take place quickly. So that we can shorten the drying time and help hair to avoid damage under the action of temperature.

Ionic hair dryer uses ion technology to care for and protect hair

The effect of negative ion hair dryer

Should i use an ion hair dryer? Our answer is yes. Because this device can bring a lot of benefits and benefits, which you can hardly find in other conventional hair dryers:

1. **Helps shorten hair drying time.**
2. **Hair protection and care:** Ionic hair dryers dry hair by using negative ion particles to break down water molecules. As a result, our hair is less affected by heat - one of the reasons hair is prone to dryness, breakage. In addition, negative ions when inflated will tighten the epidermis, help hair retain natural moisture and become softer, smoother. Many high-end ion hair dryers today are also equipped with a nano barrier feature, which helps to balance the epidermal pH and protect the scalp from the effects of ultraviolet rays.
3. **Help to clean the scalp when drying:** The negative ion particles generated by the ion hair dryer can break the structure and unbalance the electrical charge of dirt particles, thereby helping the scalp to be cleaner.

Negative ion hair dryer good, cheap?

There are many different types of negative ion hair dryers on the market today, but not all are good and affordable. If you still have not found a suitable product, here are some of our suggestions:

Hair dryer Panasonic EH-NE11-V645

Hair dryer Panasonic EH-NE11-V645 possesses a compact, modern design with predominant tones of white and purple. Products operating with a capacity of 1200W, can be folded to carry on travel, business. Panasonic EH-NE11-V645 is equipped with a negative ion air nozzle separate from the air blowing head, in order to maximize the moisturizing effect for the hair, helping hair stay healthy and shiny.

How to use Panasonic EH-NE11-V645 ion hair dryer is quite simple. On the body, there is a single switch, allowing you to adjust in 3 levels from 1 to 3, of which, level 1 is cool, suitable for thin and weak hair, levels 2 and 3 are hot, helping to dry hair. faster drying. In particular, this device also has the ability to disconnect itself when temperatures rise too high to ensure longevity and safety for users.**Reference price: 650,000 VND**
