## What is the hosting performance of GoDaddy?

### How much is GoDaddy's web hosting speed?

This is the time required for the Internet browser (Firefox, Chrome, Internet Explorer, etc.) to load a web page completely. There are many parameters that affect the speed of web page loading. One of them is the speed of loading web pages. Based on our testing, GoDaddy's web hosting speed met market standards.

### GoDaddy provides 99.9% uptime. So what does this uptime mean?

Suppose you have a business that sells products online, earns \$ 100 / minute and your hosting service suddenly stops working or no longer works! That means that after 10 minutes of hosting, you lose \$ 1000. Therefore, GoDaddy's 99.9% uptime will limit your downtime to a minimum.
