Makeup is an indispensable part of the lives of most young people today. Makeup trends also change constantly like fashion to catch up with the world. In this summer, the foggy makeup trend is making rain all over Asia. Everywhere you can see the instructions for makeup style.

Mist is an adjective, this word is often used in the makeup style of women, which means that it is only a "super light" makeup and makeup, but not makeup.

This style of makeup mist is easy to make, most of the steps are minimized to fit in this hot summer. Here is the makeup trick 'summer mist' for girls 'cake'.

First you need to give your face a light, natural, thin background.

The highlight of this makeup style will click on the eyes to create depth but still retain the natural, soft features for the eyes. Next, a very thin eyeliner makes your eyes more soulful and rounder.

If you follow this style of makeup, you often draw yourself a light eyebrow, naturally if you do not work hard to paint mist will pour down to the pool there.

Finally adding a bit of blush to make the face more rosy.

Red roses, peaches, corals . will be the perfect color for your lips when makeuping this style.
