

## What is new in Firefox 11?

In the last days of 2011, Mozilla released an update of its familiar web browser - Firefox 11 Aurora. This new version offers more outstanding features that can be used on both desktop and mobile devices.

**In the last days of 2011, Mozilla released an update of its familiar web browser - Firefox 11 Aurora. This new version offers more outstanding features that can be used on both desktop and mobile devices.**

Firefox 11 Aurora version for Windows, Mac, Linux, and Android will only be able to install after the device is updated to the browser version 9. The update for Android has a friendly interface, with lots of navigation more users. For the first time, Firefox 11 Aurora supports Adobe Flash, catching up to 2 rival Dolphin HD and Opera.

In addition to the new ' *appearance* ', many browser features have been independently separated. Including **Firefox Sync** , which allows for seamless synchronization of personal data such as passwords, visited sites and webpages along with some popular Mozilla utilities.

According to analyst Seth Rosenblatt of reputable technology website *Cnet.com* , ' *Sync is the most useful feature in mobile browsers* '. Rosenblatt said, Sync can sync web browser content from desktop to phone or tablet smoothly and quickly.

' *Open a tab on the desktop, and it almost immediately shows up on my Android mobile device,* ' Mr. Rosenblatt added.

According to Rosenblatt, Firefox 11's download speed is 1.5 times faster than the popular version of Firefox 9.

Meanwhile, Windows 7 and Vista users will no longer see *User Account Control* (UAC) for Firefox after installing Firefox 11 for desktop computers. This completes Firefox's link with Chrome's ongoing updates without users having to interact with UAC.

Other changes in Firefox 11 Aurora facilitate developers, for example: support more HTML5 codes, the ability to test Google's SPDY protocol to load web pages faster, allowing display 3D website and redesign HTML5 video controls.

Newly developed Aurora browser versions have made Firefox 10 a beta. Changes of this version give users a better experience during web browsing. Mozilla hopes that a new browser update will significantly reduce the number of utility-related issues.

Users can experience and have their own feelings about the latest version of the browser on both smartphones, tablets, laptops and desktops.
