So what is a seal? Why are so many young people using it, invite readers to learn through the article below.

## What is seal?

# Phốt là gì

Literally, simply understanding the seal is a septic tank (septic tank, septic tank, organic waste storage).

In the figurative sense, the meaning that is often used by young people is to give images, video clips . of an individual or organization that has bad deeds that affect many people to help people can be identified to stay away. The information when being leaked online is often not very good.

Phosphorus: As a person who gives public information to social networks for many people to know, the information when peeling the seal is usually not very good or their wrongdoing in order to defame someone's image in public.

Sticky seal: This is a word that refers to people who have been stripped of the truth by others, bringing this story to the light to let everyone know. Stick seals for one or more people when they are removed.

## **The purpose of peeling phosphates**

On the positive side: Sometimes peeling off is also beneficial. As mentioned above, peeling off is to expose the wrong actions of certain individuals and organizations that affect people, helping them to have the right view to avoid falling into the 'dump of car' of those who go before.

For example: When you go to a restaurant, the restaurant has poor service staff, the quality of the food does not guarantee that you will post it up for the community to know to avoid it so that it does not have to "waste your mouth" .

On the negative side: Many people who want to increase the attention of the online community to the fact that they publish often speak too much or have untrue things affecting their honor and dignity, organization. There are even people who want to be famous and create their own PR to disguise themselves.

Hopefully the article on Network Administration has helped you understand the meaning of the word phosphorus.
