Play as Alliance, DotA and in particular, in Gmail, you will see the manufacturer also designed a separate section so that users can easily filter the necessary messages and spam . Although appearing with a lot of weeks so, but many users are still vague and do not understand the meaning of what spam is. In this article, Network Administrator will invite you to follow along to find out the answers.

1. What do the symbols at the bottom of plastic bottles mean?
2. What is hot trend?
3. What does PhD, MD, MA, MSc, BA, BSc mean?

## What is spam?

Spam stands for Stupid Pointless Annoying Messages, which means stupid and annoying messages to recipients.

Spam appeared in 1978, when a man sent letters to advertise his new product to many people. He sent the same content letter to 393 people at the same time instead of sending each letter to each person as usual.

Thus, spam initially is a term to talk about sending email to many people at the same time. The content of such letters may not be meaningful, or promotional in nature, without the consent of the recipients, recipients who do not wish to receive such emails. . Shortly understood, spam is spam, junk, useless, sent blameless to a large

number of recipients, no matter whether the recipient wants to read, reply to the message or not.

Today, Spam appears on many means such as chat Spam, News Spam, Spam messages, Spam in forums, Spam on social networks. Spam here is also understood as: useless information, lack of authenticity spread widely makes many people feel uncomfortable and do not want to receive it.

The actions of copying comments from this status and then spreading the comment to other status without knowing whether the content of the comment is appropriate, then the dot-and-long comment is also closed as spam, because of that are nonsensical comments, garbage topics many people are watching.

For example: If you use Messenger Facebook, you will receive Spam messages containing advertising information, unfounded rumors, then fake winning news, nonsensical nonsensical information, not useful. what for you It even harms you. Be careful with spam messages like this.

Hopefully the above article has answered you with useful information about this term.
