I. What is a coffee maker?

Coffee maker is a widely used household appliance. Compared to the traditional way of making coffee, the coffee maker will save time and effort while ensuring the delicious and attractive taste of coffee cups.

Structure and principles of coffee machine operation

The coffee maker operates on the principle of compressing water pressure to a certain level on coffee.

Since the temperature of the steam is always high and boiling continuously, it is almost impossible to condense, thereby increasing the pressure and relying on the water pump to be sucked and applied on the coffee powder, after The same machine will disconnect the power and just need to put the glass under the nozzle to have a delicious cup of coffee to enjoy.

II. Benefits of owning a professional coffee machine

When you own a coffee maker, you will enjoy coffee more often. Therefore, owning this machine also helps bring extremely practical benefits.

Here are some uses when you use reasonable coffee:

1. **Pain relief** : According to a recent study by the University of Illinois, drinking 2-3 cups of coffee before working for about 1 hour will have better pain relief. In addition caffeine in coffee will work to enhance muscle toughness and muscle strength.
2. **Enhance memory** : Caffeine not only helps relieve pain, enhance flexibility, but it also has the ability to support memory very well, to help the mind feel better and to limit stress and fatigue.
3. **Better blood circulation** : Drinking a regular amount of coffee about 30 ml daily will increase about 30% of blood flow to the muscles, blood circulation will correspond to the ability to transport oxygen to the muscles. , cells are better. In addition, coffee also supports weight loss very effectively.
