

What is the difference between iOS 11 and iOS 10?

iOS 11 according to reviews has many new features, improved interface than iOS 10 version.

At the WWDC Conference 2017, Apple officially announced the time for iOS 11 to be released. According to the report, iOS 11 changed the interface, provided more new features. We can mention as Siri virtual assistant smarter with increased number of recognizable languages, redesigned Control Center (Control Center) interface, special control bar for iPad, . So compared to iOS 10, iOS 11 how have changes from interface to features?

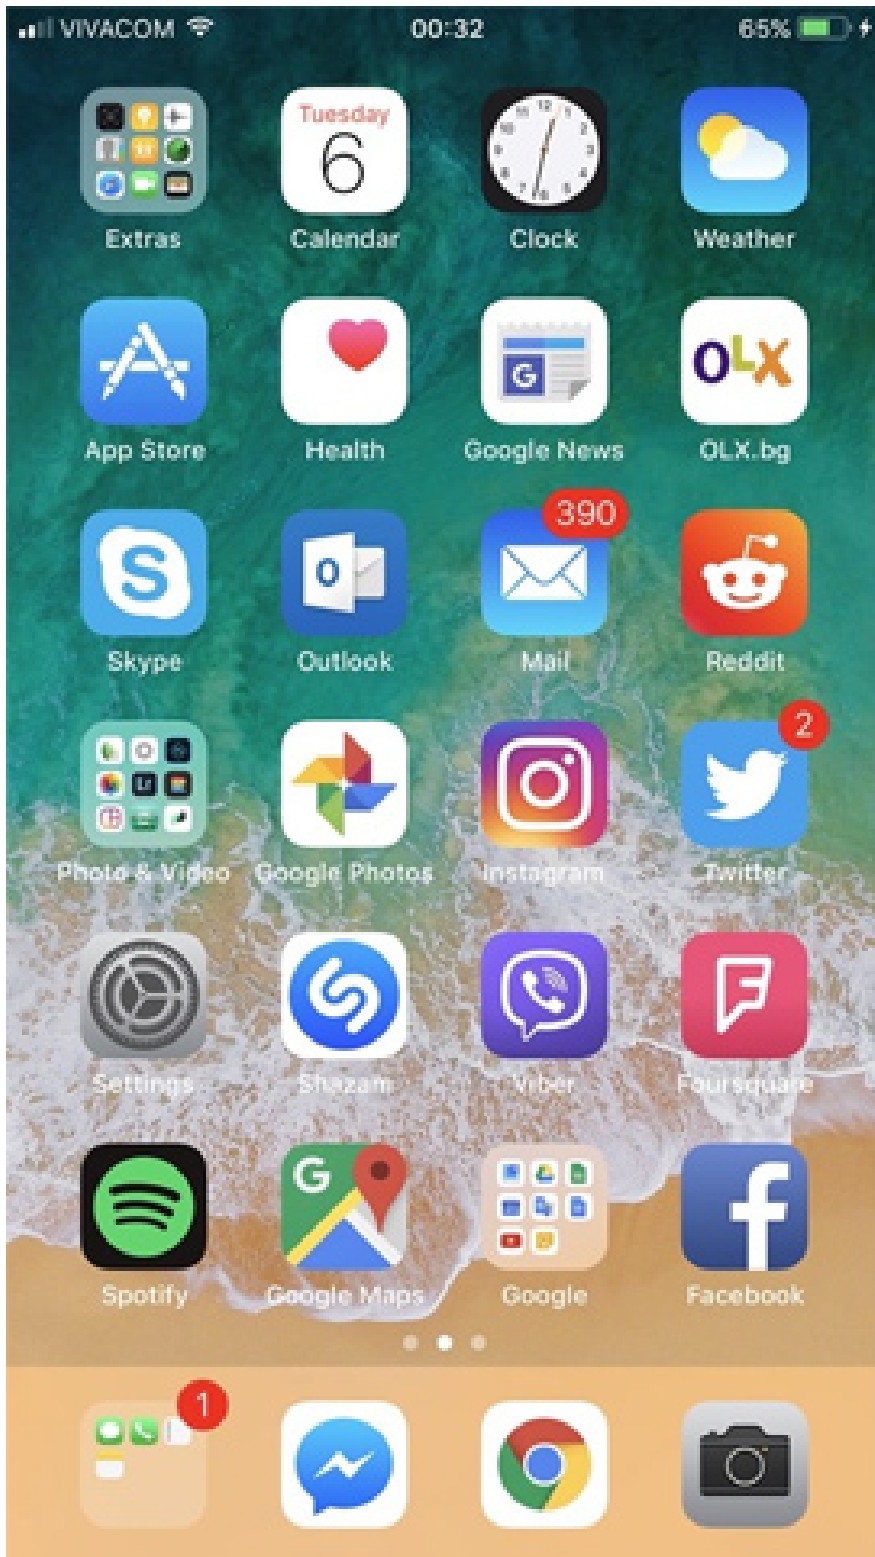

The following article will give you an overview of the major changes on iOS 11. **The left picture is in iOS 11 and the right picture of iOS 10 .**

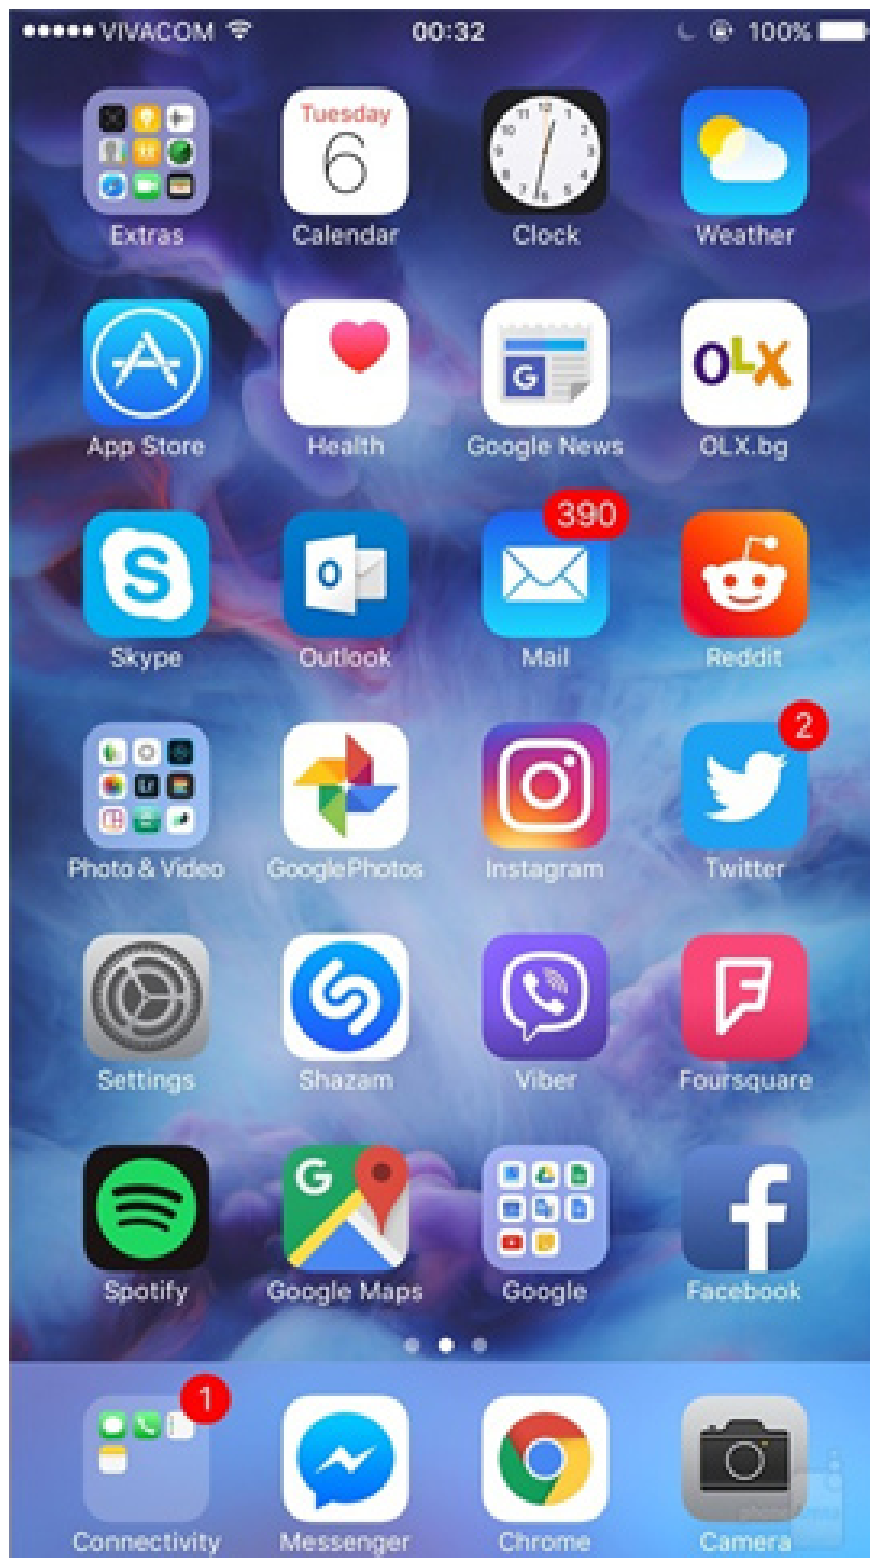

1. How to upgrade iOS 11 on iPhone / iPad

1. The Home screen main screen changes:

It is easy to see in iOS 11, the network signal has been changed to show the way to the column. The battery status has also been changed to a green, more compact design than the iOS 10 version.

The Dock bar underneath the folder names, makes the screen look cleaner. In addition, the font of the application icons is also designed to be more bold, easier to read on the bright screen background.

2. Lock screen lock screen:

Notification Center and lock screen on iOS 11 version are combined as one, when users have direct access to notifications. The message will appear by sliding your finger up on the screen, not down the screen. Notifications will appear in the middle of the lock screen interface.

3. Control Center Control Center:

This is considered the biggest change point on iOS 11 compared to iOS version 10. The new control center completely changes the arrangement, 3D operation can help you turn on or turn off options and control music . You can see the brightness and volume adjustment bar located on the right side of the interface.

In addition, Control Center also allows users to customize the settings, using more features options, applications than iOS 10 version.
