

What is the face of the stars? This app will tell you all

MakeApp is an application that reveals the smooth face of any object in the image, realizing the face in the most honest way.

To find facial editing applications on smartphones is not difficult at all. Applications such as Camera 360, Photowonder, . provide users with many features to edit faces, whiten the skin, hide defects or even make your face 'molting' completely.

But have you ever tried to visualize the rustic face behind the lipstick of hot girls, or anyone? It sounds strange but it is the criterion of MakeApp application from Magic Unicorn Inc. This application uses face detection AI technology, peels off and removes the entire makeup layer on the subject's face in the image. From that point on, MakeApp will tell us the face of woody, realistic and somewhat virtualized faces. Along with the Network Administrator, learn the 'paradoxical' MakeApp application to reveal the face of the article below.

Step 1:

Currently MakeApp is available on the AppStore as well as Google Play Store. Readers can download the application according to the link below.

1. Download the MakeApp app for Android
Download the iOS MakeApp app

Step 2:

Next, the user proceeds to start the application. MakeApp will require users to allow **access to the album** on the device. Click **OK** to agree. After that, you can choose whether or not to receive notifications from MakeApp by clicking Allow.

Users can easily compare the differences between the two images after they have been removed by MakeApp to remove the make-up and leave the face to the object.

In general, MakeApp is an interesting and somewhat 'paradoxical' application when it shows the rustic face of the object displayed in the image, while current editing applications tend to "virtualize" the face. In addition, we can try to add Add Makeup feature on MakeApp application, add makeup makeup layer for wood faces see why.

I wish you all success!
