

What is the XLSX file? What software to read?

Similar to the Doc file in Microsoft Word, users are too familiar with the XLS format file in Microsoft Excel. Therefore, many people will be surprised to receive the XLSX file. So please consult our information.

Similar to the Doc file in Microsoft Word, users are too familiar with the XLS format file in Microsoft Excel. Therefore, many people will be "surprised" when receiving the XLSX file. So please consult our information.

The XLSX file is a file for Microsoft Excel 2007 or later versions (*that is, if you are using the 2003 version or earlier, it will not work*). Therefore, to read the XLSX file, your computer must install **Office 2007** , **Office 2010** , **Office 2013** , and **Office 2016** versions.

And like Docx files, XLSX files possess "outstanding" features compared to XLS, such as smaller file sizes, safer, easier to recover (error cases), .

1. Fix error There was a problem sending a command to the program in Excel
2. The most basic functions in Excel
3. How to keep the cells fixed in Excel?

Good luck!
