5 advantages of tower fan compared to traditional fan

See also: Should you buy tower fan or tree fan this summer?

1. Tower fan has a modern design

Compared to traditional fans, this modern home is definitely a more reasonable choice. Tower fan has a modern design with many functions designed to be minimalist on the fan body. Traditional fan of rough design makes many users uninterested because it can break very beautiful space in the house.

In addition, the design of tower fan is extremely compact and occupies less area than conventional fan.

2. Wind flow

With a mechanism similar to the propeller of a propeller in an air-cooled fan, the tower will generate a more even amount of wind. Wind level from top to bottom without winding like the round wing of a conventional electric fan.

In addition, tower fans can be rotated in many different angles, suitable for accurate wind supply.

3. Easy to adjust with the control panel

The product has a simple control system with large buttons, clear icons, large LCD screen that displays operation parameters for easier control and adjustment.

4. Multifunctional tower fan

Tower fan with various functions: Spraying, using as a steam fan, ability to create ions, disperse into the air to eliminate polluting, allergy components such as pollen, mold spores . You will not be able to find these functions in a traditional fan with simple wind modes.

5. Low noise

You will no longer hear the noise every night when next summer because the tower fan operates extremely smoothly, giving you and your family a good night's sleep.

Hopefully with the above article, you can have yourself the best choice!
