

What is Wifi 7? Top 5 Wifi 7 transmitters worth buying today

Wifi 7 technology is gradually popular in life and is a potential future wireless connection network standard. Let's find out what Wifi 7 is? Top 5 Wifi 7 transmitters worth buying today in this article.

I. What is Wifi 7?

Wifi 7 is the IEEE 802.11be wireless connection standard and is an upgraded connection standard from the current Wifi 6E standard. Wifi 7 technology promises to bring great improvements in speed, latency and network capacity. Below are some outstanding advantages of Wifi 7 technology:

1. **Outstanding speed** : In theory, Wifi 7 technology is 4 times faster than Wifi 6E, the maximum speed can reach 30 Gbps. This means you can download HD movies in seconds, play VR games smoothly without lag, or join online meetings with sharp image and sound quality.

1. **Reduced transmission latency** : Wifi 7 also significantly reduces latency, greatly improving the experience for applications that require low latency such as online gaming, virtual/augmented reality and live TV next.
2. **Capacity** : Wifi 7 increases network capacity, helping to support more devices connecting at the same time without reducing performance. This is important as more and more devices in the home are connected to the Internet, such as smartphones, tablets, IoT devices, etc.
3. **Greater reliability** : Wifi 7 uses new technologies to increase connection reliability, helping to minimize connection loss and network interruptions.
4. **Better security** : Wifi 7 is equipped with new security features to help keep your data safer.
5. **Greater energy efficiency** : Wifi 7 uses less power than previous generations of Wifi, helping to extend the battery life of your devices.

II. Top 5 Wifi 7 transmitters worth buying today

In the world today, Wifi 7 transmitters are being deployed commercially. Major wireless transceiver manufacturers such as: Asus, TP-Link, Netgear, Orbi,, have introduced the latest Wifi 7 transmitter/Router products to the market.

1. Asus RT-BE96U Router – The best Wifi 7 transmitter

In previous years, Asus has always led the list of Wifi transmitters globally and the 7th generation Wifi company continues to 'usurp the throne' with the super product Asus RT-BE96U. The Asus RT-BE96U transmitter possesses three bands (2.4 GHz, 5 GHz and 6 GHz) with transmission speeds of up to 19 Gbps. The Asus RT-BE96U Wifi transmitter has 16 data processing streams, helping the connection to always be fast, stable and unclogged. In addition, the company expanded the 320MHz broadcast channel, providing more capacity for each broadcast band. Regarding hardware, Asus strongly equips a 4-core 2.6Ghz processor and 2GB RAM to help the system always operate smoothly.

Currently, the Asus RT-BE96U Wifi 7 transmitter has a reference price of about 25 million VND.

2. TP-Link Archer BE800 - The most worth buying Wifi 7 transmitter in the mid-range segment

TP-Link Archer BE800 is a tri-band Wifi 7 router designed to deliver a completely new networking experience with 4x faster speeds, 75% lower latency, and 4x greater network capacity than with Wifi 6. This is the ideal choice for households with many devices and high network usage needs.

When looking at the design of TP-Link Archer BE800, you will see that the company has drastically changed the design with a tower design, all broadcast antennas are put inside to form a perfect unified block. great. The front of the TP-Link Archer BE800 is also equipped with a 3-inch LED screen that displays network speed and performance. With a beautiful design, TP-Link Archer BE800 is aimed at modern, high-tech apartments.

Currently, the TP-Link Archer BE800 Wifi 7 transmitter has a reference price of about 13.8 million VND.

3. Netgear Orbi RBE973 – The ultimate Mesh Wifi transmitter

Netgear Orbi RBE973 is a Wifi 7 transmitter using Mesh technology with 3 devices operating in parallel. A complete Netgear Orbi RBE973 Router includes: 1 main transmitter, 2 satellite transceivers. With this Wifi 7 Mesh technology set, your home's coverage will be wider, with strong performance and easy to upgrade in the future. The Netgear Orbi RBE973 Wifi transmitter has a maximum speed of up to 27 Gbps and is equipped with 4 antennas in one transmitter to ensure a stable and high-strength signal.

Currently, the Netgear Orbi RBE973 Wifi 7 transmitter has a reference price of about 50 million VND (1 set of 3 devices).

4. TP-Link Deco BE85 – High-speed Wifi 7 transmitter

TP-Link Deco BE85 is a powerful and flexible Wifi 7 system, ideal for modern homes with multiple connected devices. With fast Wifi speeds, wide coverage and advanced security features, Deco BE85 provides a smooth and safe internet experience for your whole family.

TP-Link Deco BE85 possesses a modern and luxurious design with the main white color tone, suitable for any interior space. Each transmitter has 4 built-in antennas, which enhance coverage and improve Wifi performance.

Currently, the TP-Link Deco BE85 Wifi 7 transmitter has a reference price of about 12 million VND.

5. TP-Link Archer BE550 – Cheap Wifi 7 transmitter

TP-Link Archer BE550 is a powerful and flexible Wifi 7 transmitter that meets the needs of users who require high performance and network capacity. With fast Wifi speeds, low latency, and advanced security features, Archer BE550 is the perfect choice for your family to enjoy a smooth and secure internet experience.

TP-Link Archer BE550 possesses a modern and luxurious design with the main white color tone, suitable for any interior space. The transmitter has 6 built-in antennas that enhance coverage and improve Wifi performance.

Currently, the TP-Link Archer BE550 Wifi 7 transmitter has a reference price of about 6.5 million VND.

Above, TipsMake introduced you to what Wifi 7 is? Top 5 Wifi 7 transmitters worth buying today on the market. Good luck!
