

What kind of drilling machine is best?

Table drilling machines are very popular among mechanical people. If you still do not know which type of table drill to choose, you can not ignore the 4 products below.

Table drills are often used for the purpose of drilling holes in wood, steel, iron with continuous drilling frequencies in mechanical workshops or in industry. Therefore, depending on the purpose of use such as how to drill holes with diameter, you can choose a table drilling machine with diameter and appropriate drilling capacity.

If you are looking to buy a table drill to serve the needs of drilling holes, you should not ignore the following 4 table drill products.

Which table drills are best to buy?

The following 4 names are the best genuine drill tables on the market, mechanized, and carpenters are very trusted.

1. Maxpro MPBDP16 table drill - Reference price: 2,450,000 VND

Maxpro table drilling machine uses 220V voltage source with a capacity of 500W for ultra-fast material drilling efficiency. In addition, the drilling machine has integrated the following outstanding features:

1. The vertical drill has a height of 61cm, can adjust the work table easily to match the depth of the drill hole.
2. Drilling machine allows to adjust the speed to 9 levels with the number of extremely fast rotation from 280 - 2,350 rpm will bring high performance when drilling wood or metal.
3. Maxpro drill is suitable for drilling small bore holes with a diameter of 1.5mm - 16mm.
4. The body of the machine is made of metal so it is very firm, durable, strong base, good anti-vibration when working.
5. The motor mounted on the top of the machine with a moving shaft is 50mm.
6. Work table in square shape, rectangular base. The 3-pin tips are easy to install drill bits.
7. The weight of the table drill is not so heavy that it is easy to move when it needs storage.
8. The machine is guaranteed for 6 months.

2. Table drilling machine Total TDP133501 - Reference price: 1,730,000 VND

TDP133501 produced by Total - Germany with reasonable price is most used by Vietnamese people today. In addition, the reasons below will explain why the TDP133501 bench drill is so popular.

About design: Total drilling machine has very nice colors, easy to customize the capacity at the top of the machine. Metal rectangular brackets keep the machine fixed effectively even when the machine is operating. Stand size is 290 x 190 mm.

The work table is square in size of 160 x 160 mm. The workbench can be arbitrarily high or low.

About the ability to drill materials: Total drilling machine operates with a capacity of 350W to effectively drill holes with extremely fast 13mm diameter. The drill hole is accurate, not eccentric, not with Oval balls.

Drilling machine uses 220 - 240V / 50Hz - 60Hz voltage source. When working at the frequency of 50Hz, the machine will spin at a no-load speed of 620-22620 rpm, at a frequency of 60Hz the machine will spin at a no-load speed of 740 - 3,100 rpm, helping to drill materials extremely fast.

In terms of quality: The machine works persistently and continuously for a long time, has many good features, the ability to work in different environmental conditions is very stable, providing good productivity.

Products weighing 19kg are easy to move, 6 months warranty, assembled in China.

3. Maxpro MPBDP13 bench drill - Reference price: 2,450,000 VND

Although it is a drilling machine from China, it is a standard product, so the quality is extremely guaranteed. Maxpro table drilling machine has a rotation axis of 50mm, no-load speed can be adjusted easily with rotation from 580 - 2,650 rpm to help drill holes in iron, steel or wood very quickly.

Maxpro MPBDP13 designed engine parts, body, working table and removable base, fast assembly. When not in use it can be removed and placed in a neat storage box.

The vertical drilling machine is suitable for drilling small holes of 1.5mm - 13mm in diameter. Pair of Auto Lock-type helps to fit with many different types of drill bits, installing precision drill bits.

Maxpro MPBDP13 table drilling machine provides very standard wood drilling capability, beautiful bore hole, in the right direction. When using you can change the low height of the simple desk.

The product can drill holes with different shallow and deep levels. Robust design, durable motor will meet the demand of continuous drilling in mechanical workshops.

Maxpro MPBDP13 drilling machine operates with a capacity of 350W, compact design, using 220V voltage. Light weight of only 18.5kg helps move effortlessly.

4. Vertical drilling machine MPT MDP2003 20mm - Reference price: VND 7,200,000

MPT MDP2003 is applied with modern Chinese technology, so it can drill materials with high accuracy. The dimensions of MPT drill parts are as follows:

1. MPT table drilling machine designed 72mm column diameter so it is very sturdy, good strength.
2. The working table for drilling materials is square in size 290mm x 290mm.
3. The height of the drill is 1m.
4. The base is rectangular with a size of 420mm x 270mm
5. The distance from the spindle to the surface in the column is 180mm.
6. Distance from spindle to surface in table: 620mm.
7. Distance from main axis to bottom surface: 810mm.

The machine operates with a capacity of 750W to help drill the nose with a maximum diameter of 20mm extremely effective. In addition, with no-load speed reaching 180 - 2,770 rpm, your work will be better.

Robust design with a weight of 58kg. Simple machine design, easy to use, work to ensure safety.

Table drill machines allow speed adjustment to provide a variety of uses of different materials. Besides, you can also adjust the low height of the desk easily to drill exactly the required depth.
