Experience buying family water filters

Based on the needs of the family

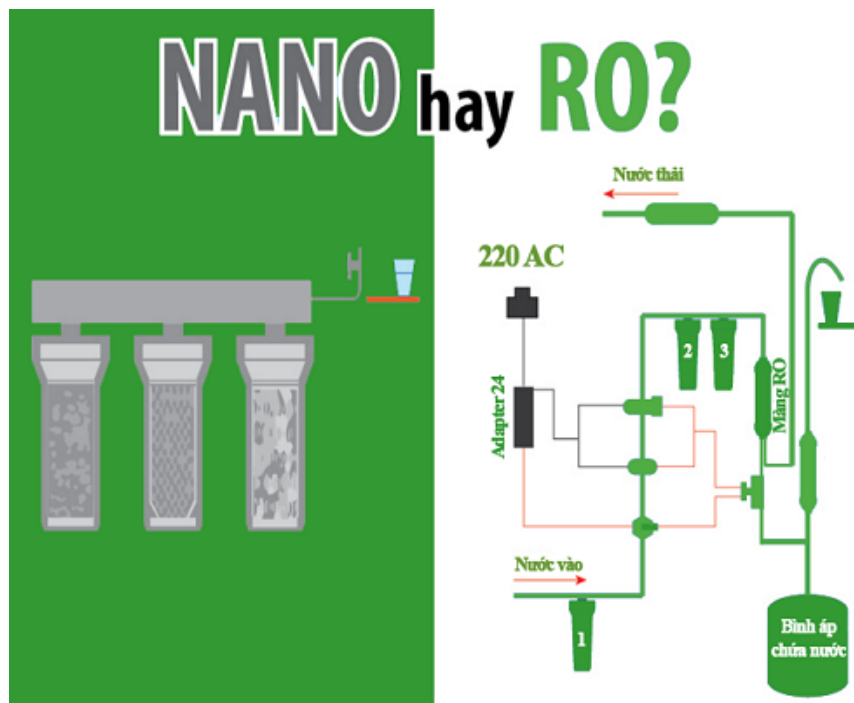

Why need to rely on demand to buy water filters for families? By water filters for families also have many types. Depending on the type, there will be different capacity, utility features and number of filter cores .

For example, if your family has few members or rarely at home, you should choose a machine with a moderate capacity, from 3-5 liters / h. For families with 5-7 members, suitable for use with a filter capacity of about 10 -15 liters / h. Or if there are more people, you can use industrial water filters, with small and medium capacity. In case families have young children, or often need to drink coffee, tea, milk for babies . then you can choose to buy water purifiers with hot and cold running water to help you more convenient.

Select filtering technology

Currently, there are two popular technologies for drinking water treatment, namely RO technology (reverse osmosis) and Nano technology (using activated carbon). Each filter technology has certain strengths and limitations.

If RO technology filters most of the input water, Nano technology can only filter tap water (cannot filter saline water, brackish water, alum, well water .). While the RO water purifier must use electricity and filter the amount of water from 30-70% because it only retains distilled water (with mineral grade depending on the number of filter cores), the Nano water purifier does not use electricity and 100% filtration. because it retains the natural minerals in the water .

Therefore, to find a suitable water purifier for your family, you base on the input water source of your family and a few other related factors.

Features and utilities of the product

In addition to the water filter feature, water filters are also equipped with a lot of other features that cater to the diverse needs and comfort of users. Some outstanding features include: 2 hot and cold taps, automatically disconnecting electricity when the water is full, LED indicators to replace the core, touch screen, . Depending on the needs and financial conditions of the family, What kind of devices should you buy?

Choose a brand of good, reputable water purifier

Which water purifier should buy for the family? What kind of good water purifier is the question of most families when wishing to buy water filters. On the market there are many water purifiers with many different brands, to choose which kind of water purifier is good, quality assurance during use, it is best to choose brands with reputation, reputation and Highly rated in the market.
