## What does a thermos bottle do?

A thermos bottle is a commonly cylindrical device with a lid, used to hold hot or cold water or drinks. This type of bottle is used very popular for people working, households, especially those with the elderly, the sick or the young.

As the name implies, a thermos bottle is the main task of keeping the drink heat close to the initial temperature after a certain period of time. The better the jar, the longer it can hold the heat.

In addition to the heat-keeping function, you can also use this as a container for regular drinks.

You can do many other things from a small thermos bottle, such as making tea, making coffee, smoothies, etc. Even some types of thermostats are designed to keep the food warm. products such as porridge, soup . It helps you save a lot of time and always have delicious food and drinks to enjoy.

The thermos bottle is also very convenient when away from work or work, you can bring hot or cold water very convenient to use.

Especially, with a small and beautiful design, it can also become an ideal gift for your relatives and friends.

## **How is a good thermos bottle?**

## **Consistent with the needs of use**

The first thing you need to do is determine what you bought the thermos bottle for? For what purpose? For example, if you only buy to store regular hot, cold water or make coffee and tea, then you should use a regular heater. If you buy to use for other foods such as porridge, soup . then you can choose to keep food thermos.

## **Material guaranteed**

One important thing that you need to consider when choosing a good thermos bottle is the material of the thermocouple. Typically, all types of thermos are made of stainless steel, while a few are made of plastic. However, the best thermos today are usually made of 304 stainless steel, a durable material, does not rust and does not contain toxic substances. Besides, the lid of the bottle needs to be made of virgin plastic, heat resistant and equipped with silicone gaskets to help keep the lid tightly closed.

## **Long heat retaining time**

Long heat retention time is also a criterion to evaluate the quality of that kind of hot and cold keeping pot. Typically, thermostats are able to retain water heat for a period of 6-8 hours. With good quality thermos can keep water heat from 8-12 hours, even up to 24-48 hours.

## **The degree of tightness of the lid**

Check the tightness of the lid as it is also a safety criterion when using a thermos bottle, the water carried does not spill or leak out. A best thermos bottle has good gaskets, making sure the jar is tightly closed so that heat doesn't escape. Also, check if it is distorted or bumped during transportation!

### **Capacity and weight accordingly**

The capacity and weight of normal are proportional to each other. Therefore, depending on the purpose of use, you can choose to buy a bottle with a suitable capacity. However, not every day to drink as much water is to choose to buy this type of capacity that much. Usually, a person will need to drink between 1.5-2 liters of water a day. The trick is that you should not choose bottles that are too small, even for personal use only. For example, if you choose a jar with a capacity of 750ml, then you will need about 3 bottles a day.

### **Design of thermos bottle**

The design of the thermos bottle does not say the quality but it also contributes to expressing your personality and style. Therefore, choose the type of bottle with the design, style, color that you love and suitable for your age. That makes you more interested and confident when using it.

### **What brand of thermos flask?**

If you do not have the ability to self-assess the best type of thermos, we recommend you to choose the brands with large brand, reputation and clear production place to ensure safety. Some of the most popular names in the field of producing thermos cannot fail to mention Elmich, Lock & Lock, Thermos, Carlmann . These are all famous names in the world, with long experience in the field. The production of heat storage bottles is trusted by many consumers.
