

What should I do if I forget my laptop password? 4 simple and effective ways to retrieve a laptop password

Do not panic when forgetting laptop password. Learn solutions and choose the right solution from easy to difficult. Anyway, it's best to write your password down in the memo note from the start or use your Microsoft account!

Forgetting the password of a laptop is a situation that no one wants at all, but it still happens sometimes, especially when you have not touched the computer in a long time. Solving this problem is not easy, but it is not necessarily too difficult.

Find out about the 4 ways to forgot laptop password below. The easiest way is use third-party tool PassFab 4WinKey. It can instantly reset login password for all Windows accounts by using this award-winning software in a truly 100% success rate. Never forgot Windows password again.

1. Method 1. Use USB boot.
2. Method 2. Access to another Administrator.
3. Method 3. Change Windows password online.
4. Method 4. Use passfab 4winkey to solve forgot laptop password.

Method 1. Use USB boot

USB Boot is a tool that can remove passwords on your computer / laptop from Windows 7 to Windows 10. This way of course we must have a USB Boot available. This method is very effective, but not recommended for those who do not know much about machines, laptops. The reason for this is because the installation is a bit complicated. You can refer to how to create a bootable USB here.

Method 2. Access to another Administrator - the easiest way to fix forgetting laptop password

There are many laptops that have multiple Admin accounts installed (such as a multi-user machine, a machine with multiple Admin for each specific purpose to avoid confusion). If your laptop has more than one administrator, we can breathe a sigh of relief even though we forgot the password. You click Switch User on the initial standby screen or press Ctrl + Del + Alt if you do not see the item to press. For computers with Windows 8 or higher, it is even easier to see because the initial screen will show the avatars of the Admin.

Once you have access to the computer, you can change the administrator's password that you forgot. Go to **Cotrol Panel => Select User account => select the account you want to change password => Select " Change the password " or " Remove the password"** depending on your needs.

The system will not ask for the old password, so changing or removing is very easy. The solution to forgetting the password of this laptop is very simple, but unfortunately it can only be used for your computer to use multiple Admin accounts in parallel.

Method 3. Change Windows password online

This next option is also very easy to implement, but provided that you must have a Microsoft account and use this account to log in and use the laptop with the forgotten password. The steps are as follows:

1. Using a computer or laptop or other electronic device, log in to this address.
2. Click on **"I forgot my password"** and click **"Next"**.
3. Enter the email address that you use with your Microsoft account. Execute the captcha code as required.
4. Select one of the verification options: phone number or email
5. The system will send a confirmation code to your phone or email. You enter the code you just received entered into the verification box.
6. The system will ask you to enter a new password twice. Enter finished you press **"Next" to** complete.
