

What test you know about operating system P12

You love to learn the knowledge about the operating system. If you feel depressed when reading long articles, try the following multiple choice questions of Network Administrator. There are many good quizzes to learn.

1. Question 1. Which moderation algorithm does not make the process wait positively?
 1. Check and set up
 2. Internal lock
 3. Semaphore
 4. All right
2. Question 2. What parameters do the parameters in the win.ini and config.sys file illustrate?
 1. Principle of functional cover
 2. Standard value principle
 3. Reasoning the control parameter table
3. Question 3. Preventive algorithm classes usually apply to systems:
 1. Medium and small
 2. Small losses occur
 3. Appears less deadlock
 4. Appears many deadlock
4. Question 4. Speaking of IBM PC memory: 'A program has access to program and program data with or less priority'
 1. It's correct
 2. False
5. Question 5. Which characteristics are not of the overlay program structure:
 1. Distribute memory in a static diagram
 2. Save memory
 3. Module in the ith class is called by module in i-1 class
 4. At one point there are more than n modules in memory (n is the number of classes)
6. Question 6. Which characteristics are not of linear program structure:
 1. Do not waste memory when performing
 2. Minimum execution time
 3. High mobility
 4. Do not use the same module
7. Question 7. For processes to share CPUs fairly, no process has to wait indefinitely to get the CPU and operating system components to use this to solve this problem:
 1. Coordinator
 2. Process management block
 3. Resource management block
 4. Distribution kit
8. Question 8. BitDiskError = 1 when there is no disk access error at the last access:
 1. It's correct
 2. False

9. Question 9. Which function is not FAT:
 1. File access management
 2. Manage free memory on disk
 3. Manage distributed memory for each file
 4. Poor quality memory management
10. Question 10. Which system is the tree directory structure?
 1. MS-DOS
 2. UNIX
 3. IBM OS
 4. A and C are right

You finished reading the article "**What test you know about operating system P12**" edited by the [TipsMake](#) team. We hope this article has provided you with many useful tech tips and tricks.
