

# What test you know about operating system P6

The operating system is an important and necessary software for any mobile device or laptop. To help readers find out more about this topic, the quiz below Network administrators have compiled and sent you.

1. Question 1. The size of an element in FAT32 is:
  1. 16B
  2. 32B
  3. 32b
  4. 16b
2. Question 2. File management system including logic access system and physical level access system?
  1. It's correct
  2. False
3. Question 3. The main function of the operating system:
  1. Manage resources and help users to exploit the functions of computer hardware more easily and more efficiently.
  2. Exploiting the function of computer hardware
  3. Operating the system and making it easier for users to exploit the functions of computer hardware
  4. Memory management, file management, process management
4. Question 4. What is a process?
  1. Program saved in disk
  2. Program
  3. The program is in progress
  4. All 3 are wrong
5. Question 5. What is the route (thread)?
  1. The basic processing unit of the system, including code, command cursor, set of registers and stack
  2. The process unit of the process includes code
  3. As part of the process's code processing process
  4. All 3 answers are correct
6. Question 6. What are the characteristics of prediction method and avoidance of congestion?
  1. Probability of major blockage, loss due to congestion causes big
  2. Probability of small congestion, loss due to congestion causes big
  3. Probability of large congestion, small loss caused by congestion
  4. Probability of small congestion, loss due to congestion causes small
7. Question 7. What is the operating system?
  1. It is a program system with functions to monitor, control the implementation of programs, manage and allocate resources so as to exploit system functions effectively and smoothly.
  2. As a system of modeling, simulating the operation of computers, users and programmers, operating in voice mode to create a favorable exploitation environment for computer systems and optimal management original.
  - 3.

A program that acts as an interface between the user and the computer hardware, controlling the execution of all types of programs.

4. All 3 answers above
8. Question 8. System calls are:
  1. Is the communication environment between the program of the user and the operating system
  2. Is the communication environment between the hardware and the operating system
  3. Is the communication environment between the program and the hardware
  4. All 3 answers above
9. Question 9. Which component is not part of the operating system?
  1. File access management program
  2. Device driver program
  3. Program to schedule the process
  4. Free memory management program
10. Sentence 10. The operating system is a system of programs that covers a physical computer that creates a logical machine with new resources and capabilities' as a view of:
  1. Manager
  2. User
  3. System programmer
  4. Technical house
