

# What test you know about operating system P7

Please read your knowledge through multiple choice questions around the operating system topic. The question set will have 10 sentences to try.

1. Question 1. What nature is not the general nature of the operating system?
  1. Convenience
  2. Stabilization
  3. Effectiveness
  4. Reliability
2. Question 2. In peripheral management, what third-generation computers onwards work according to the hierarchy?
  1. Processor - Peripherals - Control devices
  2. Processor - Control device - Peripherals
  3. Control device - Peripherals - Processor
  4. No answer right
3. Question 3. Which of the following statements is the operating system's principle: 'The operating system is divided into several parts, the components can be joined together through input and output':
  1. Principle of the module
  2. Macroprocessor principle
  3. Principles of functional cover
  4. Standard value principle
4. Sentence 4. Which of the following is the principle of the OS: 'The system never refers directly to the physical object':
  1. Control parameter table
  2. Standard value
  3. Reference parameter table
  4. Functional cover
5. Question 5. Which of the following statements is the OS's principle: 'Each job in the system can often be done in many different ways and with many different tools':
  1. Principles of functional cover
  2. Standard value principle
  3. The macroprocessor principle
  4. Reasoning the control parameter table
6. Question 6. In FAT32, what is the largest file size?
  1. 16GB
  2. 2GB
  3. 8GB
  4. 4GB
7. Question 7. How many threads must a process have?
  1. 0

2. first
  3. 3
  4. Unknown
8. Question 8. Logic management is the organization of the program structure?
1. It's correct
  2. False
9. Question 9. Is the linear structure a program module full of information about the program?
1. It's correct
  2. False
10. Question 10. Which program structure cannot implement shared sharing module?
1. Overlay structure
  2. Paging structure
  3. Module structure
  4. Linear structure
