

What to do if the noise canceling mode of AirPods Pro is not working properly?

Soundproof mode is the biggest plus point of AirPods Pro. However, this mode sometimes does not work as expected. So how to overcome this situation?

Noise cancellation is the biggest plus of AirPods Pro, so you definitely want it to work most effectively. However, contrary to expectations, the diet on this headset began to show opposition. Is there any way to fix this situation? Or do you have to endure throwing \$ 249 out of the window?

When the noise cancellation mode works, AirPods Pro filters all ambient sounds, helping you enjoy your favorite songs without being disturbed by children's screams or car noise. on street.

However, if this mode of AirPods Pro does not work effectively, the headset will be no different from its predecessor AirPods, and the amount you have to pay extra drifts away with the noise out there. Here are ways to help you conserve your money.

How to fix AirPods Pro noise canceling mode does not work properly

Apple often gives the reason that your iPhone, iPad or Mac device has not been updated to the latest system version, so such a problem occurs. So make sure to update the software for your device first. If the update has already occurred and the problem persists, do the following:

1. Put AirPods Pro on your ears and check if noise canceling is turned on. You can do this on a Mac by clicking **the speaker icon** in the menu bar, selecting **AirPods Pro** and pressing **Noise Cancellation** . On iOS devices, **press and hold the volume bar in Control Center** , then select **Noise Cancellation** from the bottom of the screen.

Turn on noise cancellation mode from iPhone

2. Cleaning the black net on AirPods Pro, this is the part that comes into direct contact with your ears. Dirt from the ear or the environment may reduce the noise cancellation feature on the product.

The black net is in contact with the ears

3. Contact Apple Support. If you've tried the above and the noise cancellation mode still doesn't work, there's a good chance your AirPods Pro is in trouble. And in this case, only Apple will solve it for you.
