

What to do when losing your Facebook password?

Currently, users are facing the risk of losing personal Facebook when the problem of reporting is becoming more dangerous and larger scale. Many people lose their nick of unknown reason and actually the current recovery is bad - bad because the number of users on Facebook is too large.

Currently, users are facing the risk of losing personal Facebook when the problem of reporting is becoming more dangerous and larger scale. Many people lose their nick of unknown reason and actually the current recovery is bad - bad because the number of users on Facebook is too large.

In case of being gathered by another group of reporters, it is really difficult to save for Facebook users. First of all, they will not know the reason, or unknowingly, will make their Facebook account without wings and fly almost " *insanely* ", the only point that users rely on now is sewing. lucky The individual Facebook reports have to wait for approval according to the standard rules of this social network and the operating center does not have too much time to consider each locked case to reopen. So being able to reopen a personal page at this time or even later is a good thing, bad luck is not completely recoverable. As for the loss of normal passwords, things become much simpler.

Web browsers now support the ability to save passwords and automatically log in after each domain access, Facebook is no exception. And when you regularly use the password memorization feature on your computer, when you use it on a computer or another mobile device, you can't remember your password. Or more specifically, you are facing the risk of losing control of your personal information and privacy when you have a malicious intent to hack your account. The steps below will help you quickly find your password.

Step 1 . Access and Facebook through the browser.

Email hoặc điện thoại Mật khẩu

Duy trì đăng nhập

Step 2 . Select Forgot password, then type the email address to register your Facebook account and then press Search.

Tìm tài khoản của bạn

Email, điện thoại, tên người dùng hoặc họ tên

Tôi không thể nhận diện tài khoản của mình

Step 3 . There are three ways to recover that Facebook provides for you including:

- Using a Google account: When you use the Chrome browser all passwords will be backed up at your Google account and the login will restore your saved password. This is the fastest recovery method.

Đặt lại mật khẩu của bạn

Bạn muốn thay đổi mật khẩu của mình bằng cách nào?

-  **Sử dụng tài khoản Google của tôi**
Đăng nhập để Google (nếu bạn chưa đăng nhập) để nhanh chóng đặt lại mật khẩu.
-  **Hãy gửi liên kết đặt lại mật khẩu đến email của tôi**
tuanviettb91@gmail.com
t*****b@y****.c**.vn
-  **Gửi tin nhắn có chứa mã đặt lại mật khẩu cho tôi**
+*****91

- Send password reset link to email: use this method when you are sure to use this account-specific email and sending mail will include two emails that you previously registered with Facebook. Then Facebook will send you the code into the mail, usually this will happen immediately (*if in inbox mail you do not check the spam box*).

Mail Facebook sent to the mailbox

Kiểm tra email của bạn

Kiểm tra email – chúng tôi đã gửi cho bạn email có chứa mã xác nhận gồm sáu chữ số. Nhập mã vào bên dưới để tiếp tục đặt lại mật khẩu.

Chúng tôi đã gửi cho bạn mã đến:
tuanvietb91@gmail.com
t*****b@y****.c**.vn

Tôi không nhận được mã nào

Tiếp tục Hủy

Enter the code received from Mail

Chọn mật khẩu mới

Mật khẩu mạnh được kết hợp bởi chữ và dấu câu. Mật khẩu phải có ít nhất 6 ký tự.

Mật khẩu mới ?

Xác nhận mật khẩu

Hãy đăng xuất tôi khỏi Facebook ở tất cả các nơi khác mà tài khoản của tôi có thể mở.
(Chọn tùy chọn này nếu một người lạ sử dụng tài khoản của bạn.)

Tiếp tục Hủy

Change the password

Enter the verification code and enter a new password, so make sure to check out the Facebook box at all other places to avoid possible bad events or bad intentions that won't fulfill your purpose.

- Send a message containing the password reset code: When registering for Facebook, you will have the option to log in with the phone number, and this phone number can be used to receive the password reset code as in the mail, The next steps do the same.

Thus, with only three steps you can restore your account when attacked by bad intentions or by the market but forget this detail.

Besides losing passwords, many users also wonder why personal Facebook is temporarily blocked due to login from multiple devices. The simple answer is that Facebook will collect your usage habits to determine which devices you usually use, in which region IP addresses to determine whether you are or not. If you use someone else's device to log in to Facebook or simply an incognito mode, Facebook will automatically lock temporarily and need to go through a confirmation step so you can continue using it. Usually, quick and user-selected restores are photos of friends.

These are simple ways to restore the best operating status for your personal Facebook. And there's a little advice, if you lose your password and there's no way to recover, ask your friends " *report* " for that lost personal Facebook to " *die* " to avoid the worst case. Shared privacy secrets.
