

What to do when the Macbook has a Flash Player error not showing up?

Many users of Safari's Macbook often encounter browser error Flash, black screen when watching Youtube ... How to fix this error?

As a product of Adobe System, Adobe Flash Player is an extremely familiar application for today's users. This is an Actionscript program that allows the transmission, download and playback of image or video data.

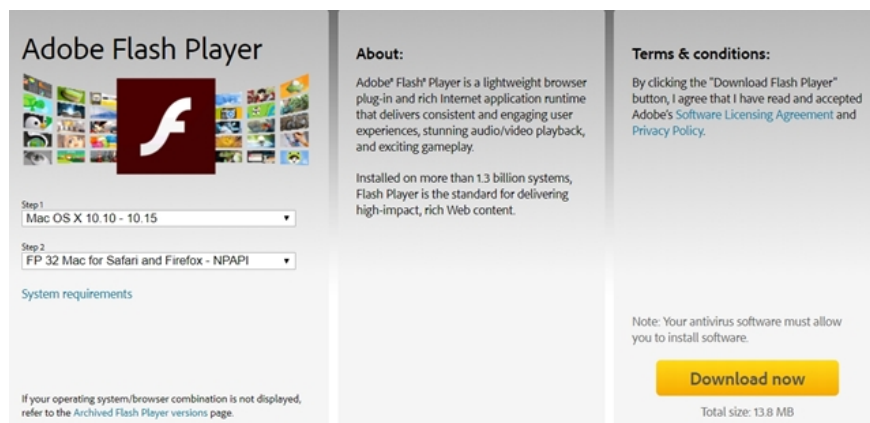

Put simply, Adobe Flash Player is a browser-enabled application so that computer users can view images, videos or audio directly on web pages without having to use any software.

Before the operating systems were sketchy, it was mandatory to install Adobe Flash Player. However, since Adobe decided to stop developing and supporting Flash Player, browsers have turned to HTML5 technology instead.

For Macbook users, sometimes specialized video sites like Youtube, Dailymotion, Vivo . require Adobe Flash Player to watch. This results in a browser error, black screen display and video playback.

Adobe Flash Player utility has the most optimal and stable operation from Safari 5.0 and above. Users can download this support application and reinstall it to avoid errors. How to reload and install the following:

Step 1: Download the Adobe Flash Player for Macbook application at the homepage. Users need to select the operating system used as well as the version of Adobe Flash Player to download and then click Download Now.

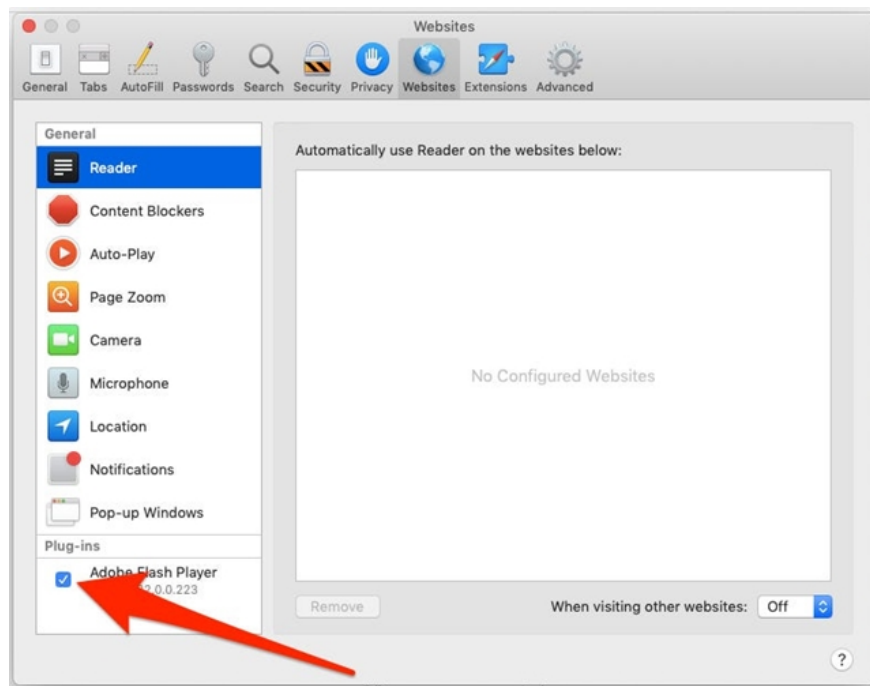

Step 2: At the homepage, click Install Now. The system will automatically download the Adobe Flash Player installer and double-click it.

After the installation interface appears, click Install Adobe Flash Palyer.

Step 3: Proceed to install Flash Player for the device. In this step, you need to close the browser if you are using it. How to install is quite simple when you just need to click Next until the process is complete.

In addition, you can also unblock Adobe Flash Player application on Safari. Now, users need to select Setting -> Preferences ., navigate to Extensions. The screen will appear Adobe Flash Player, click on the "When visiting other websites" option in the bottom right corner of the window and select Allow to let Safari automatically download Flash content.

Please note, Adobe Flash Player will only be available to use until 12/31/2020.
