4. Where to buy genuine baby locator watches?

## Experience in buying baby locator watches

Instead of just interested in price, form, color, when choosing to buy a watch because you care about the quality of the watch device, because it determines the effectiveness of safety protection. of your child. Specifically, these are the basic elements below:

### **Alarm function of the positioning clock**

This is an important function built into the child locator watch, usually designed with SOS emergency button. When you see danger, your child will press this button and it will automatically report on their parents' mobile phones via SeTracker 2 tracking application. Parents will know where their baby is and promptly handle it.

Not only that, the locator clock also has other warning functions such as unplugging alarms, battery outages, out of safety zones . so that parents can control more easily.

### **Listening function of call and text messaging**

Besides the warning function, when choosing to buy a child locator watch, parents should pay attention to the 2-way call and texting function of the product. It is very useful in emergencies, parents need to advise or remind their children. Compared to buying a phone for children, the clock has just integrated positioning, can also contact the child is much more convenient and useful.

### **Battery life**

Do not ignore the battery mode of the locator. Because it regulates how long you can use the watch. To ensure the product can be used for a long time without being interrupted by the battery running out, the battery is low, you should carefully consider the parameters before choosing. Ideally, you should choose a battery range of about 300-600mAh, this is the most reasonable time for school age children.

### **Security mode**

The majority of navigation devices today, not just the locator product line, face a lot of trouble related to data security mode, leading to the risk of data hacking. Some manufacturers are fixing this. Therefore, parents should choose products and the watch manufacturer has a security mode. So, don't worry about hackers taking advantage and disturbing.

## **Warranty**

When buying, please ask for warranty for the product you have purchased and must have invoices and vouchers to prove the origin. This is the benefit of all customers when buying goods at reputable, genuine establishments. The warranty mode not only proves that the product is genuine, but is like a 'ticket' for the safety and quality of the product.

## **Origin, brand**

Brand origin of the locator not only relates to the quality of the product, it is also a measure of consumer confidence. So, choose reputable brands, trusted by many people, so you will easily find the best product and really feel secure when using it.

Some names stand out for children locating watches that you can choose to buy in Vietnam market today such as: Q50 Wonlex, Pado, Indell, Kiddy Viettel, Xiaomi .

## **What is a good brand watch for children, should you buy?**

### **Wonlex child locator watch**

Wonlex locator watch is a famous Chinese smart watch brand, has been well received and favored in many countries around the world, including Vietnam.

Wonlex stands out with its modern design, style, dynamic and youthful colors, especially trendy and high-tech. The best known and most popular product in this brand's line is the Wonlex Q50. This is also one of the company's early models.

In addition, it is equipped with cloud computing technology to manage accounts so the product has very high security. Besides, there are other smart features such as anti-dirt, very effective waterproof .

Another advantage of products that make many people happy is the affordable price, in line with the financial capacity of the majority of families. Currently, the price of genuine Wonlex positioning watch ranges from 600 thousand to 2 million. This is considered a relatively cheap price compared to other child positioning watches on the market.

### **Pado child positioning clock**

Also a brand from China, Pado child positioning watches have features that are inferior to other brands in the market.

At first glance the Pado watch, you will see the outstanding design is extremely dynamic, beautiful. Not only that, the features of Pado are also easy to use, friendly, flexible to help monitor and protect children effectively.

Currently, Pado is being distributed in Vietnam and neighboring markets, and is welcomed by consumers. Products range in price from 800 to 1 million, a price that is quite "soft" for families.

## **Child positioning meter Kiddy Viettel**

Not to mention, many people will guess that this is a technology product of Viettel telecommunication group Viettel - a pioneer in Vietnam in the field of producing baby watchmakers.

Along with Wonlex, Kiddy is a big market share in the market in Vietnam, creating a fever that is not small for families. Besides the basic features like other positioning clocks such as GPS, 2-way calling, warning, security . Kiddy also integrates many other features such as making friends, measuring the amount of movement, giving bonus points . and usually cost between 1 and 1.5 million. Product deserves to be a companion with children on the roads.
