In the process of catching Pokemon, it is not uncommon for us to catch the same kind of Pokemon. Maybe you will own several Pokemon, or even nearly a dozen Pokemon of the same type. If we think that the same types of Pokemon are worthless, it is completely wrong. Every kind of Pokemon you catch has their effect and in different ways.

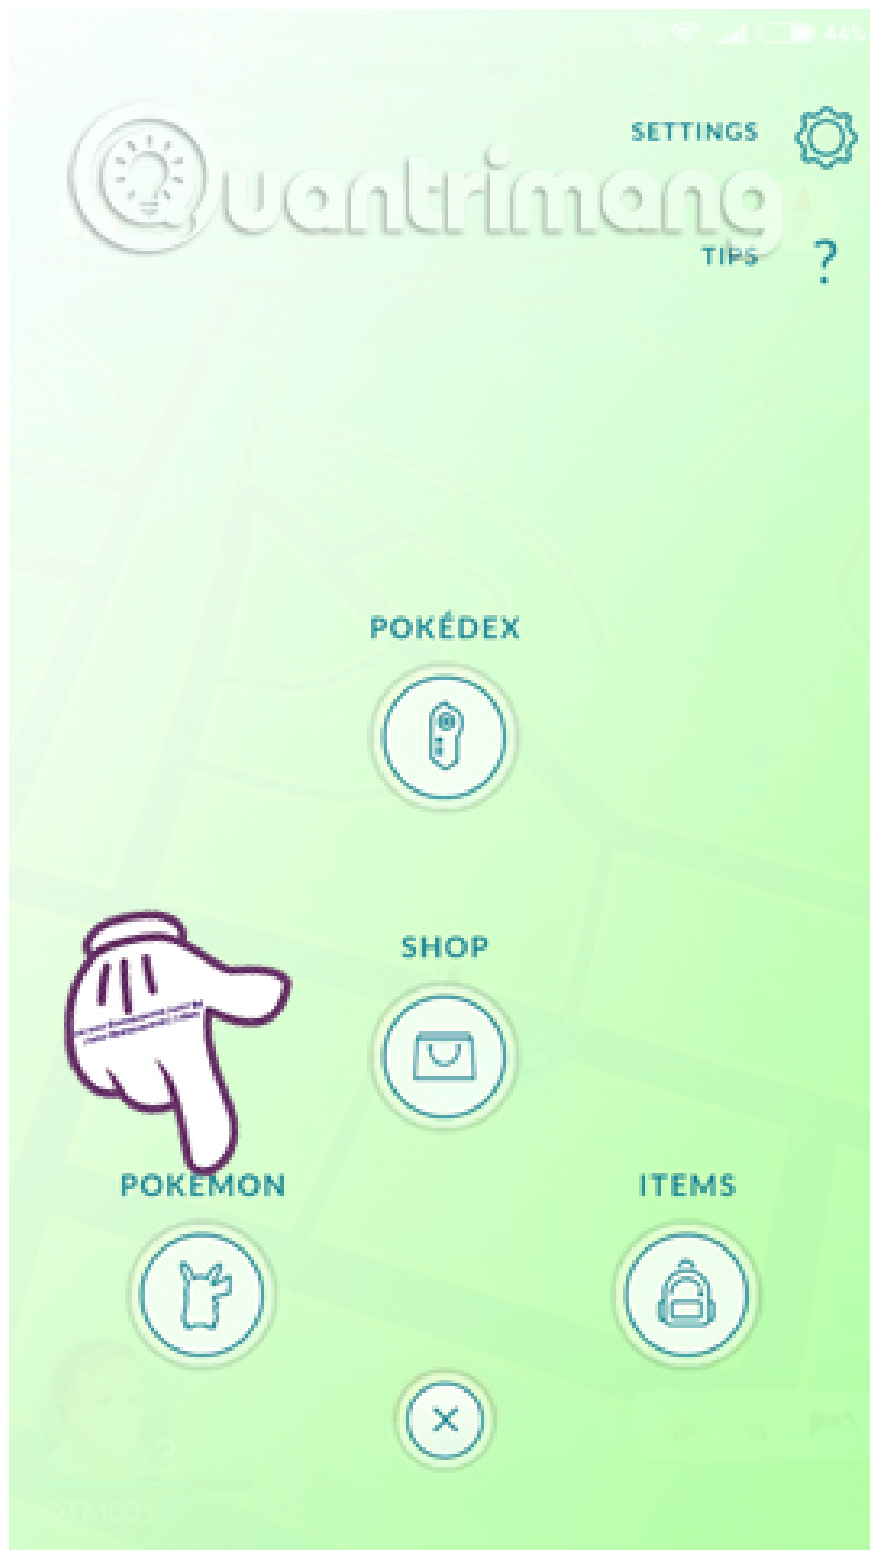

For these same types of Pokemon, the only way to exploit them is to transform them. The transformation of them is also a way to upgrade in Pokémon Go, which we told you in the article Things to know to upgrade Pokémon in Pokémon Go. When conducting a successful transformation, you will receive a certain number of Candy candies, used for important evolution.

How to Transfer Pokemon in Pokémon Go

Step 1:

At the main interface of the game, you click **the Pokéball ball icon** right in the middle of the screen. Next, at the new interface, click on **Pokemon with Pikachu icon** as shown below.

Step 2:

Appears a **list of Pokemon** that the player caught with **the Pokemon on the left** interface and the **number of Eggs eggs on the right** of the interface. Here, you will see the same types of Pokemon, the same type of name. Choose a type of Pokemon you want to transform and select them.

Immediately after that appears detailed information about Pokemon that includes CP, HP, Pokemon type, . You click **the icon 3 dashes at the** bottom right of the screen. For example, I choose to convert Pokemon Rattata.

Step 3:

Two options appear, click **Transfer** with the candy icon to choose to switch Pokémon. The game will ask if you want to convert this Pokémon? Click **Yes** to agree and perform the conversion process.
